BELIEVE.

AT POLARIS, WE'VE SPENT THE LAST HALF-CENTURY ON THE SNOW. RIDING. BUILDING. TESTING. LEARNING. AND AFTER THOSE FIFTY YEARS, WE'VE GAINED A HARDENED KNOWLEDGE OF WHAT MAKES A BETTER SLED. THOSE LESSONS HAVE TAKEN ROOT AND GUIDE US IN EVERYTHING WE DO. THEY TAKE THE SHAPE OF METAL AND BECOME NEW AND BETTER MACHINES. **POLARIS SNOWMOBILES 2005.**

WHAT'S RIGHT ALWAYS

A half-century ago, Polaris began. We started with nothing more than some spare parts, a will to enjoy winter and our deep-rooted Minnesota perseverance. What came out of those initial efforts were a few snowmobiles, basic and primitive. But, nonetheless, designed to perform in the world's harshest conditions. Fifty years later, we're still here, building better and more innovative sleds, fully dedicated to putting five decades of hardened snow knowledge to use in order to fulfill an age-old mission of helping people find The Way Out. That is why this company, and these machines, endure.

So as we enter into the second half of our century, we proudly introduce our new snowmobiles. As you flip the pages and take a good look at them, surely you'll find some of them decidedly different from past machines. They bear our name, but look closer and you'll discover they have one thing in common with every Polaris machine that's ever rolled off the line. They're done right.

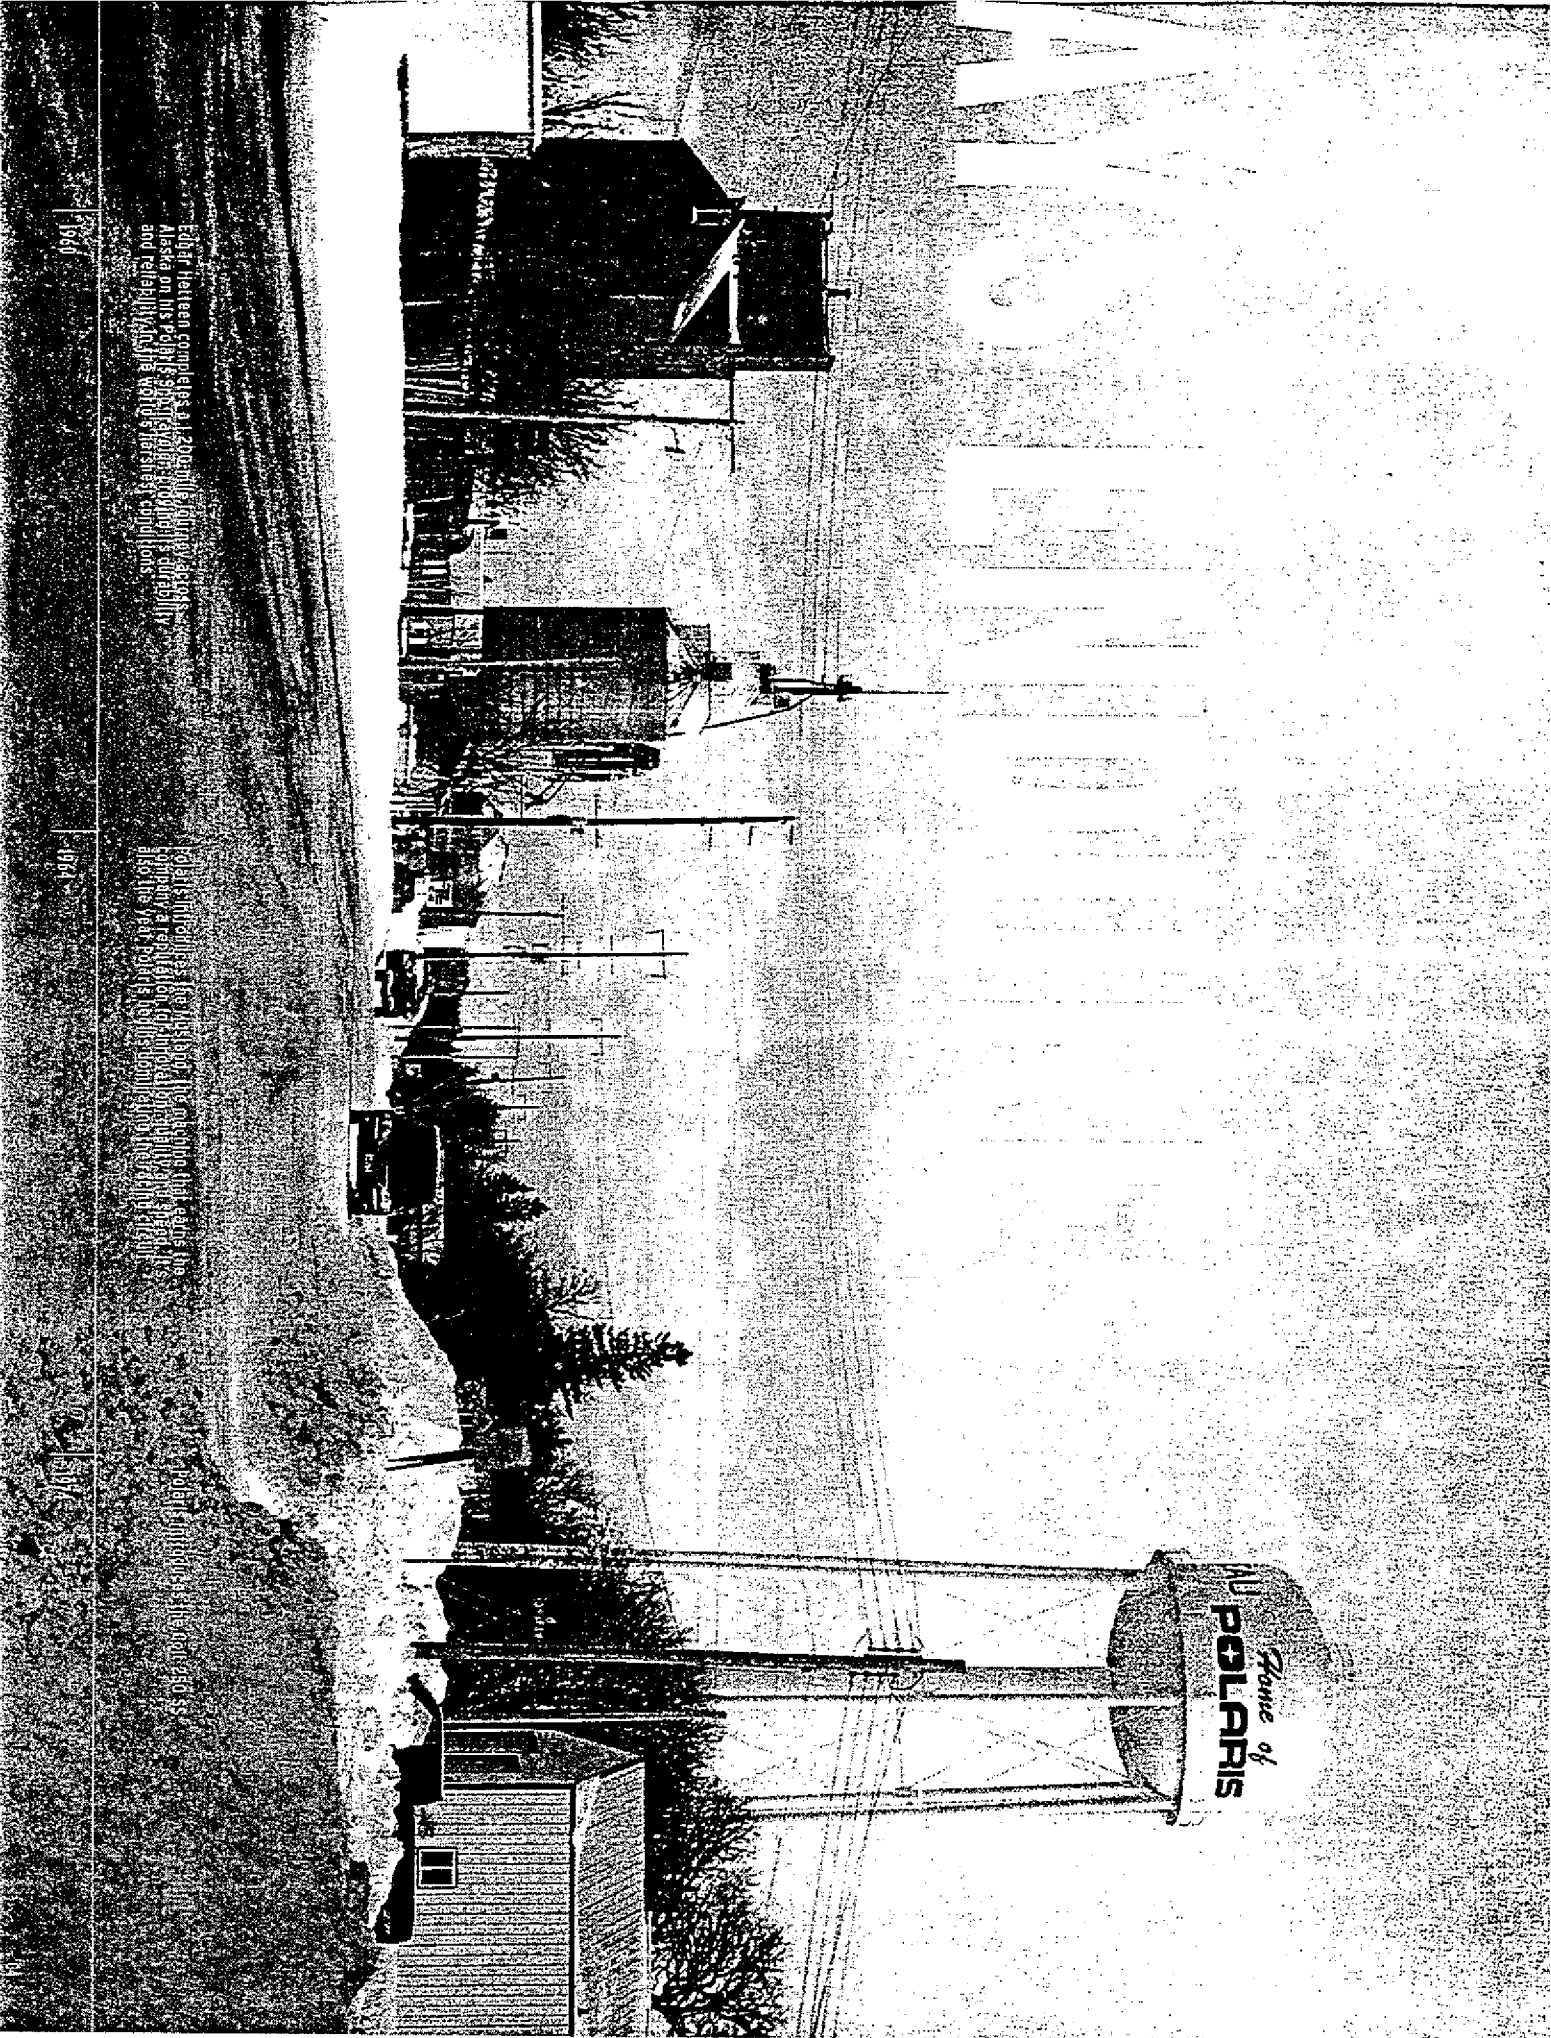

And with this year's model year 2005 Polaris all-terrain vehicles, snowmobiles and ATVs, we continue to make it a point to make sure you have the most reliable, most comfortable and most fun machines in the industry. We maintain this through the factory doors and in the field. Our technology and talent will face no rival from anybody's company.

Polaris snowmobile takes you places no other sled possibly can.

Edgar and Allen Helgen and David Johnson start a small machine shop in Roseau, Minnesota, called Helgen-Holt & Derrick, where they manufacture machines for skiers, ice hosts, west sports, trail sleds and snow sleds.

Helgen-Holt & Derrick is a small Polaris affiliate. Holt & Derrick is a small Polaris affiliate.

The new Polaris snowmobile, number one in its class, is a small Polaris affiliate. It weighs 160 lbs. and has a top speed of 40 miles per hour.

Edgar Helten completes a 120-mile run in Alaska on his 40th birthday. Helten's durability and reliability are the hallmarks of his company.

Edgar Helten, the founder of the company, a reputation of durability and reliability. The year Polaris is the best of the best.

Edgar Helten is the founder of the company.

POLARIS CONTENTS

Polaris introduces the Apollo and TX340/440.

Polaris releases the T-4 Indy, the first consumer snowmobile with an independent front suspension.

Polaris produces the first electronically fuel injected (EFI) snowmobile, the 650 RX.

Polaris introduces the XLT, the first triple.

Meet the first-ever no-compromise performance sled with patent-pending Rider Select™ steering. It's the perfect balance of power and control, a lot of both.

The most advanced mountain sled on the planet. Designed by mountain riders for mountain riders, the new 900 RMK rises above all others with a focus on industry-leading flotation.

XC SP™ named "The Perfect Sled" by *SnowGoer* magazine. Confidence comes standard on the best-riding, best-turning, tried-and-true all-around performance leader.

Sleep. Deep. There's nothing the industry-leading EDGE™ RMK can't rise above.

Quickly becoming the trail rider's sled of choice, the Switchback™ delivers on-trail and off-trail versatility with equal prowess.

Why trade performance for comfort? The Classic makes the most of every mile. In comfort, yet still packs the power to go all out.

Comfortable and versatile, this is by far the most convenient way to ride for two. Or even one. Its two-up design converts to a sporty, stylish seat to go solo.

Fully featured and all-out fun, there's no better way to start the entire family out on the trail.

Combining fifty years of snowmobile excellence with limited-edition sleds and gear.

The latest in warm, dry apparel and top-notch, custom accessories, designed to both personalize and accessorize the ride.

1995
Polaris introduces the first RMK, the Rocky Mountain King.

1997
Polaris introduces the first Edge Edition sled.

2000
Polaris EDGE named best-riding sled ever.

2005
Polaris celebrates its 50th Anniversary, introducing the 900 Fusion and the 900 Trail Sport and the dawn of the future of Polaris snowmobiling.

THE AVAILABLE

PERFECTLY INTEGRATED FEATURES TAKE THE RIDER TO A NEW LEVEL

The ultimate snowmobile experience goes beyond mere physical control. It's a complete integration of you and your machine. To accomplish such symmetry, the smallest details cannot be overlooked, which is why every contact point of the new Fusion has been engineered to be an extension of the rider. Running boards feature integrated grips. Toe hooks are perfectly contoured to fit the tops of your boots. Footrests are angled for ideal comfort and control. Handlebar angle and height are optimized. Grips have been formed and knurled. Console and gauges are positioned for optimum visibility. And the list goes on. It all adds up to a snowmobile that allows you to focus on the most important thing — the ride.

THERE IS A PERFECT BALANCE OF POWER AND CONTROL. IT'S A LOT OF BOTH.

AFTER FIFTY YEARS OF HITTING THE TRAILS, WE'VE COME TO THIS STEADFAST BELIEF: POWER AND CONTROL ARE BEST ENJOYED IN LARGE VOLUMES. SO WE BUILT A MACHINE THAT'S EQUAL PARTS AGGRESSION AND CONTROL, STRENGTH AND ADJUSTABILITY, AGILITY AND CONFIDENCE, SERIOUSNESS AND FUN. INTRODUCING THE ALL-NEW, POWER-MEETS-PRECISION, 900 FUSION. PACKAGED IN A NEW CHASSIS, THE 10."

RIDER SELECT™ STEERING FOR ULTIMATE CONTROL

Some would like you to believe you've been riding snowmobiles the wrong way for far too long. Guess they've never ridden a snowmobile as intelligently designed as the 900 Fusion. Developed upon a theory of totally integrating man and machine, the new 10 chassis adapts to the most important element of any snowmobile: you. It starts with the Polaris Rider Select steering system, which allows the new Fusion to adjust to the way you ride. Instead of the other way around. With seven handlebar positions serving up 6 inches of adjustability, we've redefined the term "rider control." With the simple push of a button, you can adjust your relationship to the vehicle, putting you in the optimum riding position for comfort and control with less fatigue, no matter your size or riding style. From standing up to attack a windswept downhill, positioning to conquer a twisting river bottom trail or stretching out for a leisurely afternoon ride, Rider Select puts you in the ideal position.

ATTACK POSITION

When Rider Select steering is adjusted to the far forward positions 6 or 7, rider mass is moved forward as well. It allows for easy sitting-to-standing transitions and maximum agility in rugged terrain.

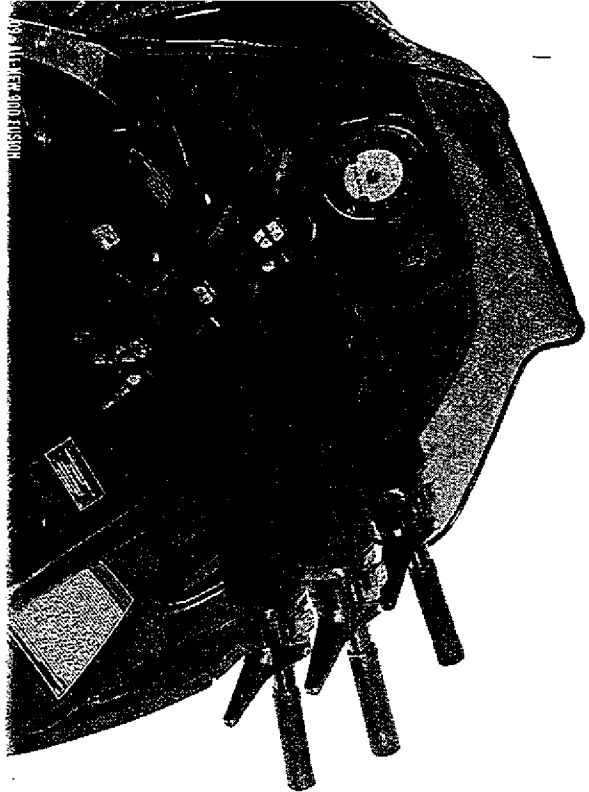

CONTROL POSITION

Push the Rider Select steering to the middle positions, and the 10 chassis transforms into a perfectly balanced trail sled. This adjusts rider mass for unsurpassed handling and bite in the corners.

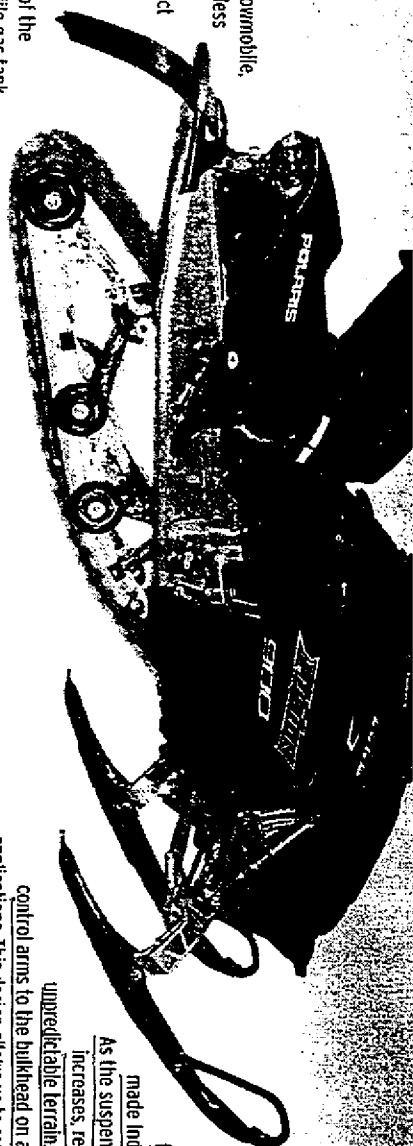

COMFORT POSITION

Put the easy-to-adjust Rider Select steering system far back to positions 1 or 2, and the intelligent 10 chassis delivers all-day trail comfort. With rider mass shifted rearward, driver curves are relaxed and comfort is optimized.

SUPERIOR SEAT DESIGN FOR A SUPERIOR RIDE

Blended into the overall dynamics of the snowmobile, our new contoured seat enables near effortless transition from sitting to standing and back again, and fully complements the Rider Select steering. Sit back for a moment, and you'll find a wide, firm and comfortable base to accompany you on an all-day ride. Slide forward, and the seat's tapered profile integrates flawlessly with the smooth lines of the console, recessed recoil handle and low-profile gas tank. It puts you in position for maximum control, and offers comfort and protection to your knees and legs while negotiating the nastiest terrain. From front to back and everywhere in between, the new Fusion seat integrates you with the machine and redefines rider control.

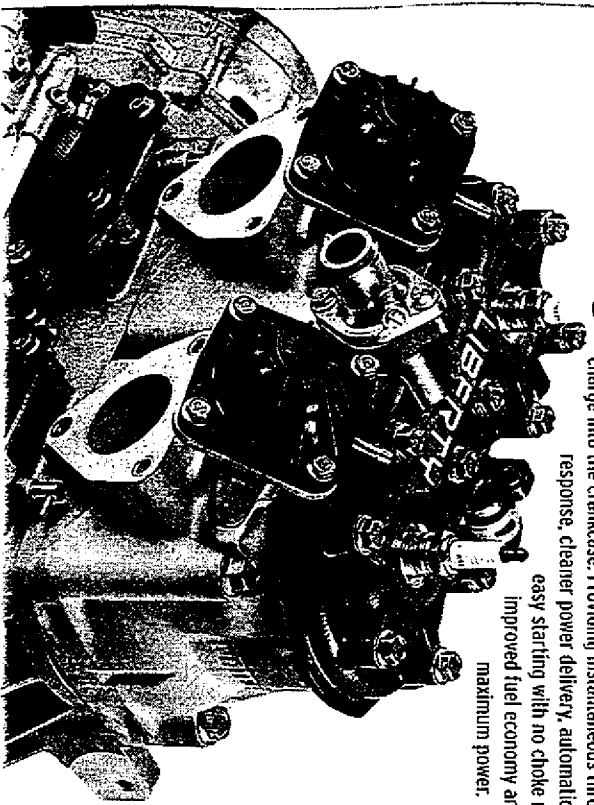

NEW 10" FRONT SUSPENSION

Welcome to the best ride on snow, the new 10" front suspension. Featuring a patent-pending Variable Caster design, the new 10" inherits many of the traits that made Indy® the benchmark of comfort and control. As the suspension travels through its range, caster angle increases, resulting in unmatched stability even through unpredictable terrain. A triangulated mounting design affixes the control arms to the bulkhead on a cantilever plane, similar to automotive racing applications. This design allows us to mount the upper and lower control arms on a nonparallel axis for less bottoming and added strength. Point and shoot the new Fusion down a mogul-filled trail, and you'll quickly understand.

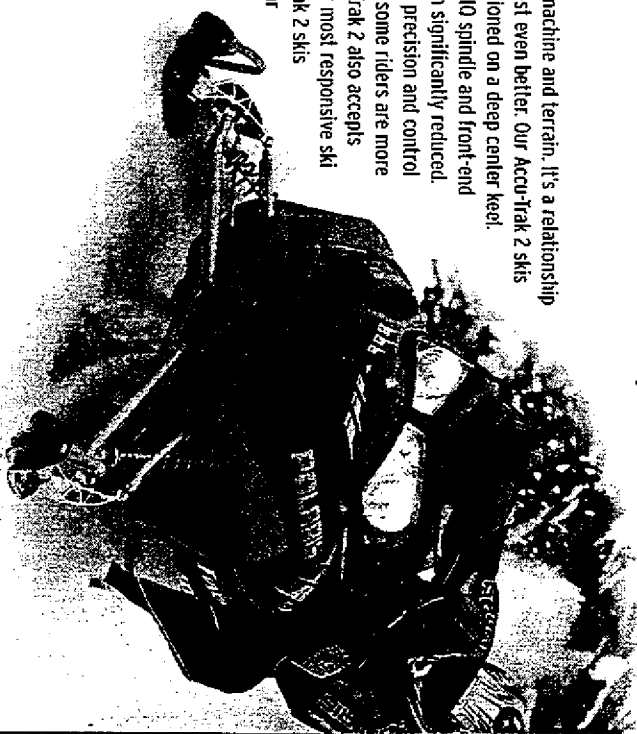

THE NEW LIBERTY 900 ENGINE - PURPOSE-BUILT POWER

Nothing stirs the soul of a snowmobiler more than pure, unadulterated power. So the all-new Liberty 900 engine with Cleanfire™ injection is built to redefine ultimate trail acceleration. This lightweight high-displacement twin features a long-stroke, high-torque design to deliver maximum corner-to-corner grunt and slingshot velocity. Because of its broad torque curves, Liberty is smooth and responsive, with unsurpassed power delivery from idle to redline. The all-new Liberty engine is also built to last, featuring Gralaf™-coated pistons, Micasil-lined cylinders, an oversized crankshaft and main bearings. Deformation Elimination Technology (DET™) and new titanium exhaust valves. The new cooling system delivers increased engine cooling even in low snow conditions by means of a perimeter cooling design, with a turbocharged rear cooler and a radiator located in the front cowling. Liberty also benefits from our new Cleanfire injection system. Cleanfire injection features a batteryless injection system with dual injectors directly introducing a fuel charge into the crankcase. Providing instantaneous throttle response, cleaner power delivery, automatic calibration, easy starting with no choke required, improved fuel economy and maximum power.

ACCUTRAK™ 2 SKIS

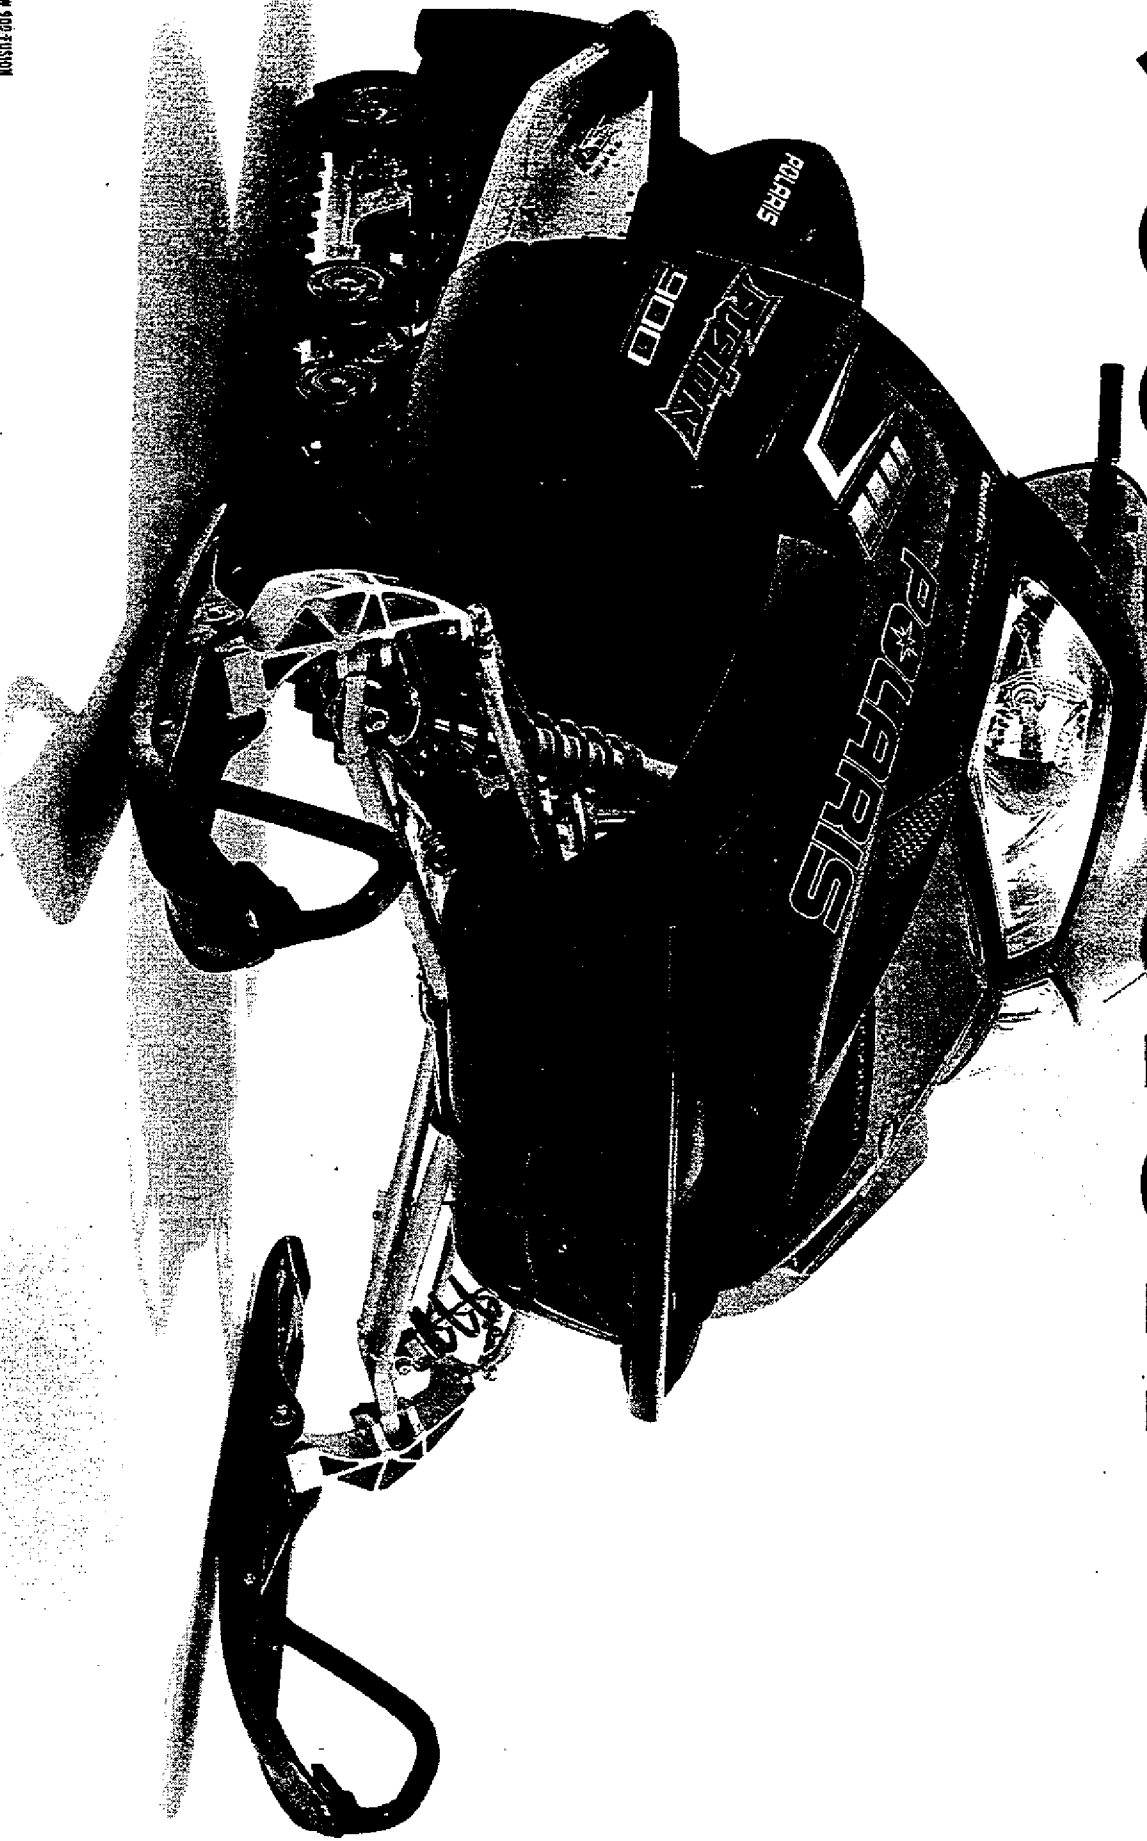

Skis are the critical link between machine and terrain. It's a relationship so important that we made our best even better. Our Accu-Trak 2 skis feature dual carbide runners positioned on a deep center keel. Combined with our new high-tech 10 spindle and front-end geometry, steering effort has been significantly reduced. The result is complete confidence, precision and control with virtually no darting. Knowing some riders are more aggressive than others, the Accu-Trak 2 also accepts a single runner carbide giving our most responsive ski an even more potent bite. Accu-Trak 2 skis are also 15 pounds lighter than our previous performance skis, which means less unsprung weight for improved suspension performance and quicker reactions to what the trail dishes out.

BRILLIANT HEADLIGHT DESIGN

Pumping out pure white light onto the night's snow-covered trail, the new Fusion headlight is not only the brightest we've ever produced, it is also the most intelligent. Packaged in a stylish and aggressive four-hub case with a wraparound lens and chrome reflectors, the Fusion headlight features two high-powered halogen bulbs for optimum trail projection, plus twin Snow Beams™ that illuminate immediately in front of the machine. Together, they deliver outstanding vertical and horizontal lighting. The wraparound design of the headlight and clear-lens taillight provide side-lighting and reflectivity for increased visibility and safety. Additionally, you can quickly adjust where all this light is aimed - right from the seat, thanks to an easy-to-use dashboard-mounted rotary dial.

900 Fusion™

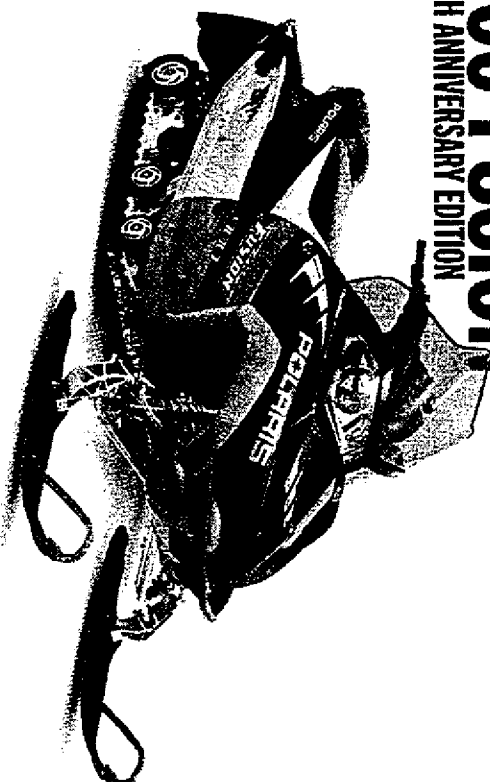

900 FUSION

900 FUSION

50TH ANNIVERSARY EDITION

WHEN WE BUILT THE ALL-NEW FUSION, WE DUG DEEP AND LOOKED AT EVERYTHING. FROM THE WAY INFORMATION IS DISPLAYED TO A RIDER, TO THE WAY LIGHT GETS DEFLECTED FOR MAXIMUM VISIBILITY. WE EVEN LOOKED AT HOW TO KEEP A STORAGE COMPARTMENT BONE-DRY. IN THE END, THIS IS HOW YOU DELIVER ON A FIFTY-YEAR COMMITMENT TO MAKING EVERY SINGLE DETAIL EXACTLY RIGHT.

NEW POLARIS LIBERTY 900 ENGINE WITH CLEANFIRE INJECTION

Underneath the hood of the new 900 Fusion you'll find the new Liberty engine. Built to deliver loads of low-end torque with a smooth powerband right up to redline. It features Cleanfire Injection for instant throttle response, improved fuel economy, cleaner running and maximum power, no matter the temp or altitude. With the Fusion's forward intake and exhaust design, the cylinders are canted back toward the rider 22° and the entire engine is mounted low and in perfect harmony with the IO chassis.

NEW IO CHASSIS

The new IO chassis features centralized mass for the ultimate in control. Running boards feature integrated grips. Toe hooks to fit the tops of your boots. And footrests that are angled for ideal contact.

RIDER SELECT™ STEERING

Our exclusive Rider Select Steering dramatically positions your body in the optimum relationship to the snowmobile, based upon your preferred riding style.

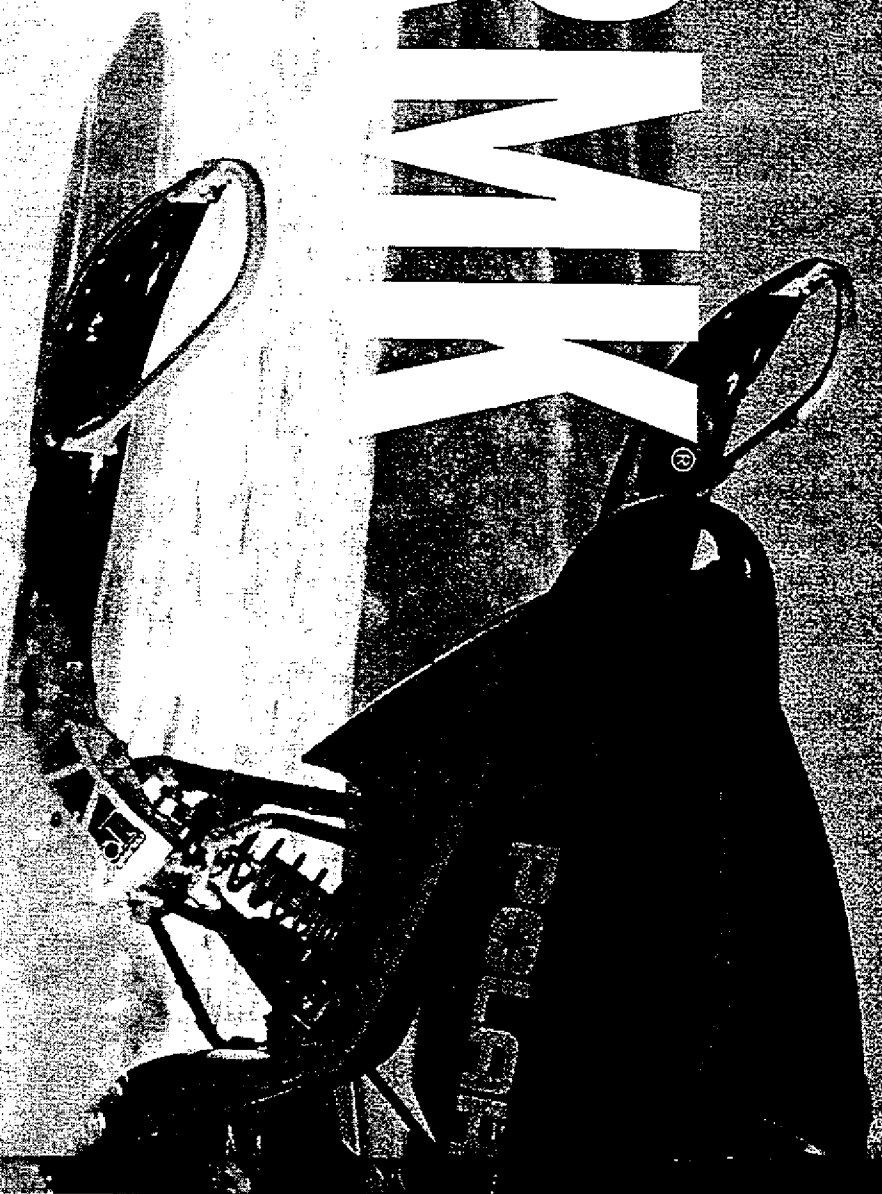

NEW IO REAR SUSPENSION

The new IO rear suspension features an all-new rail and leading edge materials for a 10 pound reduction in unsprung weight. New torque arms feature a new geometry that improves weight transfer and acceleration, a new progressive-rate shock linkage and fully coupled rail for 12" of rear travel. A gas-charged front-track shock and a new Fox® P55 Position Sensitive rear-track shock combine to control the ride like never before.

RIDER FEATURES

Fusion features Accu-Trax™ 2 skis with dual carbide runners on a deep contour keel for precision control with virtually no darting. You also get Polaris Electric Reverse Control (PERC™), which lets you move in reverse at the push of a button without the extra weight of mechanical systems. Shockwave™ pattern track for improved side-bite and traction, integrated tunnel wear strips, ergonomic-designed bumpers, true Progressive Motion Ratio front shock geometry, removable side panels and sealed storage compartments complete the long list of refinements.

THE ALL-NEW 900 RMX

WIDE AND FLAT FOR SUPERIOR FLOTATION

Getting on top the snow and staying there is the most critical element of deep snow prowess. In designing the 900 RMK, we analyzed every component that comes in contact with the snow to better understand the all-important characteristics of "float." Unlike competitive mountain sleds, the 900 RMK nose pan was developed with a dramatically reduced front angle of attack - a shallow 18° to be exact - to properly position the RMK chassis for a smooth transition atop the snow. Then we went to work making the nose an extra-wide 22". The added width delivers more surface area for superior flotation, while simultaneously diverting snow out and around the front-suspension components. These design characteristics, along with a smooth and contoured pan, allow the all-new RMK to get on top of the snow quickly and efficiently. Once there, only the sky and your imagination are the limits.

OUT HERE, WHAT DOESN'T FLOAT, DOESN'T FLY.

WHERE THE JAGGED OUTCROPPINGS OF THE ROCKY MOUNTAINS MEET THE SKY, A SNOWMOBILE IS ONLY AS GOOD AS ITS ABILITY TO GET ON TOP OF THE DEEP POWDER. WE SET OUT TO PURPOSE-BUILD THE GREATEST MOUNTAIN SLED EVER TO CLIMB AND FLOAT LIKE NO OTHER. INTRODUCING THE NEXT GREAT POLARIS DEEP SNOW MACHINE, THE ALL-NEW 900 RMK.

RIDER SELECT™ STEERING PUTS YOU IN CONTROL

During a near-vertical ascent above the tree line, you should be in charge. Which is why we developed a revolutionary new steering feature, Rider Select™ that dramatically affects vehicle dynamics, rider control and the ability to ride all day without tiring. Rider Select allows you to adapt to the way you ride so you can conquer the wide array of conditions faced during a day in the mountains. With a simple push of a button, you can adjust the handlebars forward and back a total of 6 inches over seven adjustable positions. Push the bars far forward to "attack" positions six or seven, and standing up comes naturally, allowing you to easily shift your weight from side to side while centralizing the mass of the snowmobile. It makes the machine feel lighter and react quickly to rider input. Pull the bars back to the middle "control" positions and weight transfer is more pronounced, making sidehilling practically second nature. Adjust the bars all the way back to "comfort" positions one or two, and you can maximize rear weight transfer for deep snow mobility. Or simply stretch out in comfort after a long day of boondocking.

ATTACK POSITION

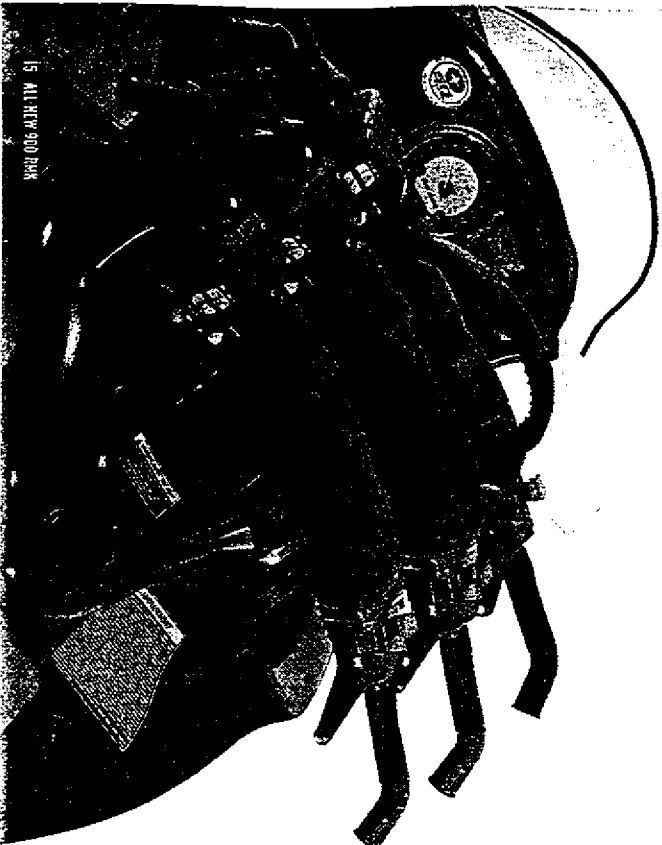

Adjust the Rider Select steering to the far forward positions 6 or 7 and rider mass adjusts forward as well. It allows for easy sitting-to-standing transitions and optimum deep snow agility.

CONTROL POSITION

Push the Rider Select steering to the middle positions, and the 60 chassis transforms into a perfectly balanced mountain sled. It positions rider mass for unsurpassed handling and maneuverability.

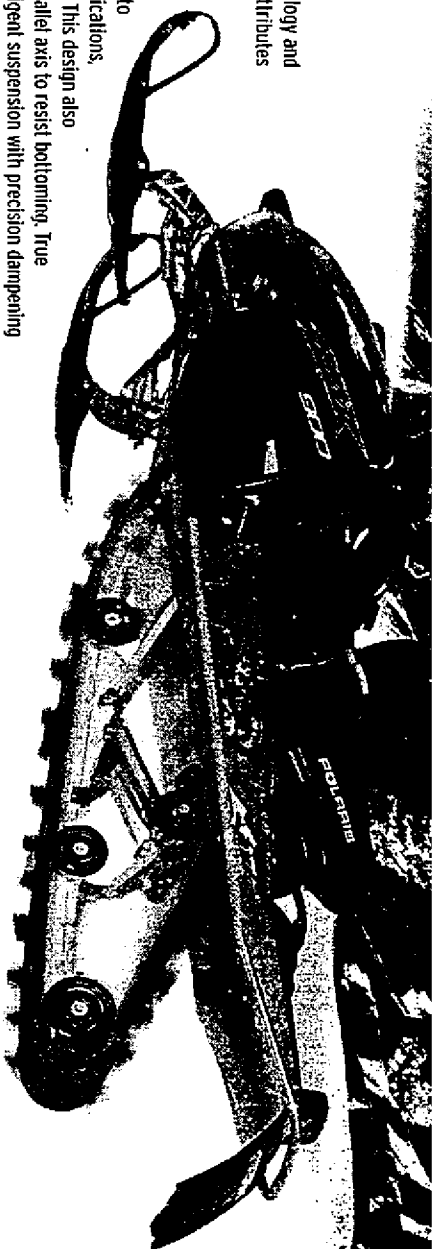

COMFORT POSITION

Pull the easy-to-adjust Rider Select steering system far back to positions 1 or 2, and the intelligent 60 chassis delivers maximum weight transfer in addition to end-of-day comfort.

NEW 10" FRONT SUSPENSION

Built upon a legacy of industry-leading suspension design, technology and ride quality, the new 10 Front Suspension reaps the rewards and attributes set forth by our legendary Indy® suspension. Featuring our patent-pending Variable Caster design, the new 10 suspension delivers an unmatched level of control and predictability by increasing caster angle as it travels through its range. A triangulated mounting design where the control arms are affixed to the bulkhead on a canted plane, similar to automotive racing applications, results in a design that is lighter, yet stronger in critical locations. This design also allows us to mount the upper and lower control arms on a nonparallel axis to resist bottoming. True Progressive Motion Ratio shock geometry then controls this intelligent suspension with precision dampening through the entire range of travel. Couple the high-tech new spindle with near-zero bump steer, and the result is greatly reduced steering effort. This means you can tame the roughest trail, traverse unknown meadows with confidence, and predictably conquer a windswept peak with the smoothest ride in the industry. While the others are sacrificing "reliability," know that the new RMK will get you higher on the mountain than ever, and at the same time, deliver unrivaled performance to and from the deep stuff.

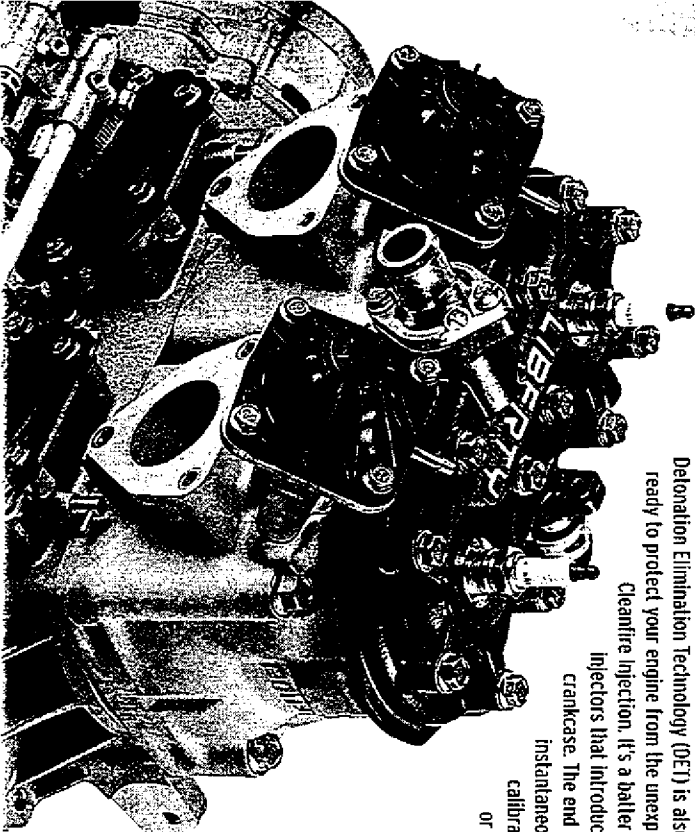

ALL-NEW LIBERTY 900 ENGINE WITH CLEANFIRE INJECTION

Powering the 900 RMK is our new Cleanfire-injected Liberty powerplant. Hit the throttle, and you'll see we built it to deliver a broad and fat torque curve, and dish out the type of useful power that can ease you atop the snowpack one second, then hurt you up the face of the mountain the next. To achieve this, we designed a long-stroke, high-torque engine that churns out huge doses of responsive power low in the rpm range. Ease into the throttle, and the new 900 spools up seamlessly without hesitation. Crack it open, and the engine responds with instantaneous controlled fury. We constructed the new 900 Liberty to be strong and durable. So you'll find an oversized crankshaft and case for strength, Micasil-lined cylinder walls, Gralac-coated pistons and titanium exhaust valves to endure through the most demanding applications. And our latest

Detonation Elimination Technology (DET) is also found on the new Liberty 900, ready to protect your engine from the unexpected. Liberty 900 also features

Cleanfire Injection. It's a batteryless injection system with dual injectors that introduce a fuel charge directly into the crankcase. The end result is an engine that delivers instantaneous throttle response, automatic calibration no matter the temperature or elevation, easy starting with no choke required, improved fuel economy and maximum power.

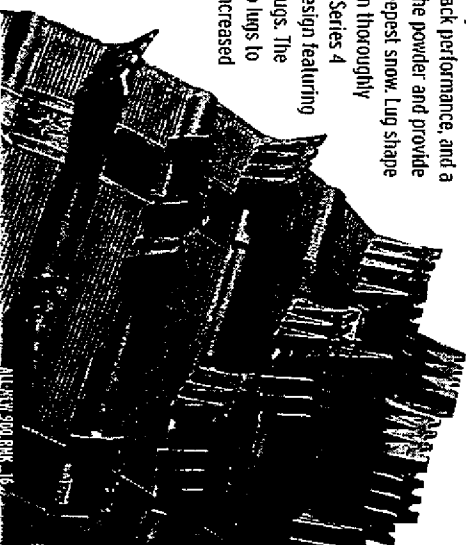

INTELLIGENT CHASSIS DESIGN FOR DEEP SNOW TRACTION

From the aggressive tunnel angle and bulkhead relationship to tapered running boards, every inch of the all-new 10" RMK chassis was purpose-built to slice through powder. The rear of the tunnel is lighter and stronger due to a new rear cooler design. It's also angled upward to allow the 900 RMK track to dig deep and find the elusive firm snow base for optimum acceleration and deep snow mobility. Running boards are narrowed toward the rear and flared upward so as to not hang up or high-center in deep snow. Underneath, brackets and fasteners are engineered to hug the chassis tight, making for a smooth and flowing path of little resistance. It's a level of intelligent engineering designed to take you higher than ever before.

SERIES 4 TRACK - THE WORLD'S MOST VERSATILE AND DURABLE

To build a track that excels in the deepest powder, yet is robust enough to get to the trailhead and back, is no easy task. This is why we designed our exclusive Series 4 track in-house. Benchmarked as the most versatile and durable track ever to grace a mountain sled, thanks to its split-diameter technology, the Series 4 track is available with a 2" lug height on 15" and 15.9" models. Split-diameter technology speaks of a lug design that features a stiff base for durability and hardpack performance, and a soft, flexible tip to massage the powder and provide uncompromising lift in the deepest snow. Lug shape and placement have also been thoroughly designed and tested, and the Series 4 delivers with a "leanwork" design featuring several opposing, staggered lugs. The concept allows all of the deep lugs to work as a team, and deliver increased traction even if one or two individual lugs lose their bite. 2.4" powder track available during Snow Check™ Select.

900 RMX[®]

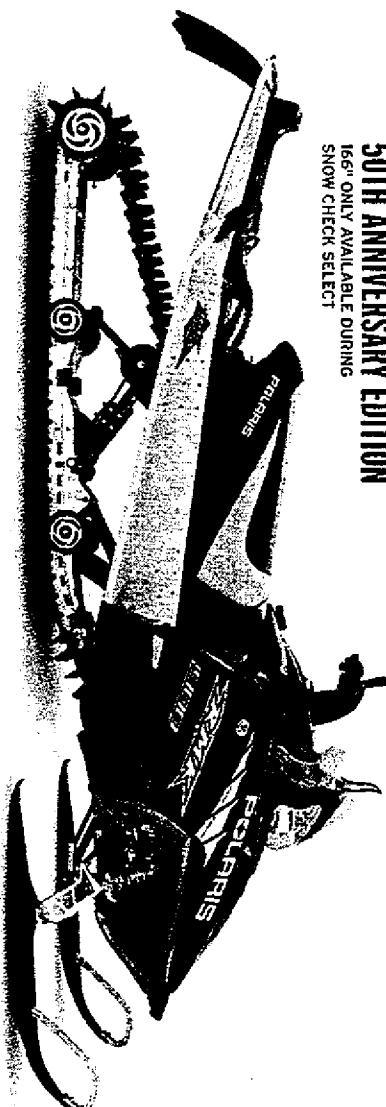

900 RMK

AVAILABLE IN 151" AND 159" WITH 2" LUG

900 RMK - 166"/2.4" LUG

SNOW CHECK SELECT

151" AVAILABLE WITH 50TH ANNIVERSARY COLOR AND GRAPHICS

DESIGNED IN THE WEST FOR THE WEST. FROM THE MOMENT WE DEDICATED OURSELVES TO DESIGN THIS PURPOSE-BUILT MOUNTAIN SLED, NOTHING WAS OVERLOOKED. THROUGHOUT THE 900 RMK'S DEVELOPMENT WE STAYED STEADFAST IN OUR ATTENTION TO DETAIL. THE RESULT IS A MOUNTAIN MACHINE PURE IN ITS INTENTIONS.

NEW POLARIS LIBERTY 900 ENGINE WITH CLEANFIRE™ INJECTION

Underneath the hood of the new 900 RMK you'll find the new Liberty engine. Built to deliver loads of low-end torque with a smooth powerband right up to redline. It features Cleanfire Injection for instant throttle response, improved fuel economy, cleaner running and maximum power, no matter the temp or altitude. With the RMK's forward intake and exhaust design, the cylinders are cooled back toward the rider 22° and the entire engine is mounted low and in perfect harmony with the 10 RMK chassis.

ALL-NEW LIGHTER-WEIGHT 10 RMK CHASSIS

Designed to aid in flotation and slice through the snow with minimal effort and drag. The unique hood-to-pan relationship deflects snow down and around the snowmobile with vents designed for maximum under-hood airflow while minimizing plunging in extreme deep snow. Sculpted shock wells and a unique snow deflection lip divert snow from the rider.

RIDER SELECT™ STEERING

Our exclusive Rider Select Steering allows you to adjust the handlebars forward and back a total of 6 inches over seven different positions to adapt your sled to the way you ride instead of the other way around.

ALL-NEW 10 RMK REAR SUSPENSION

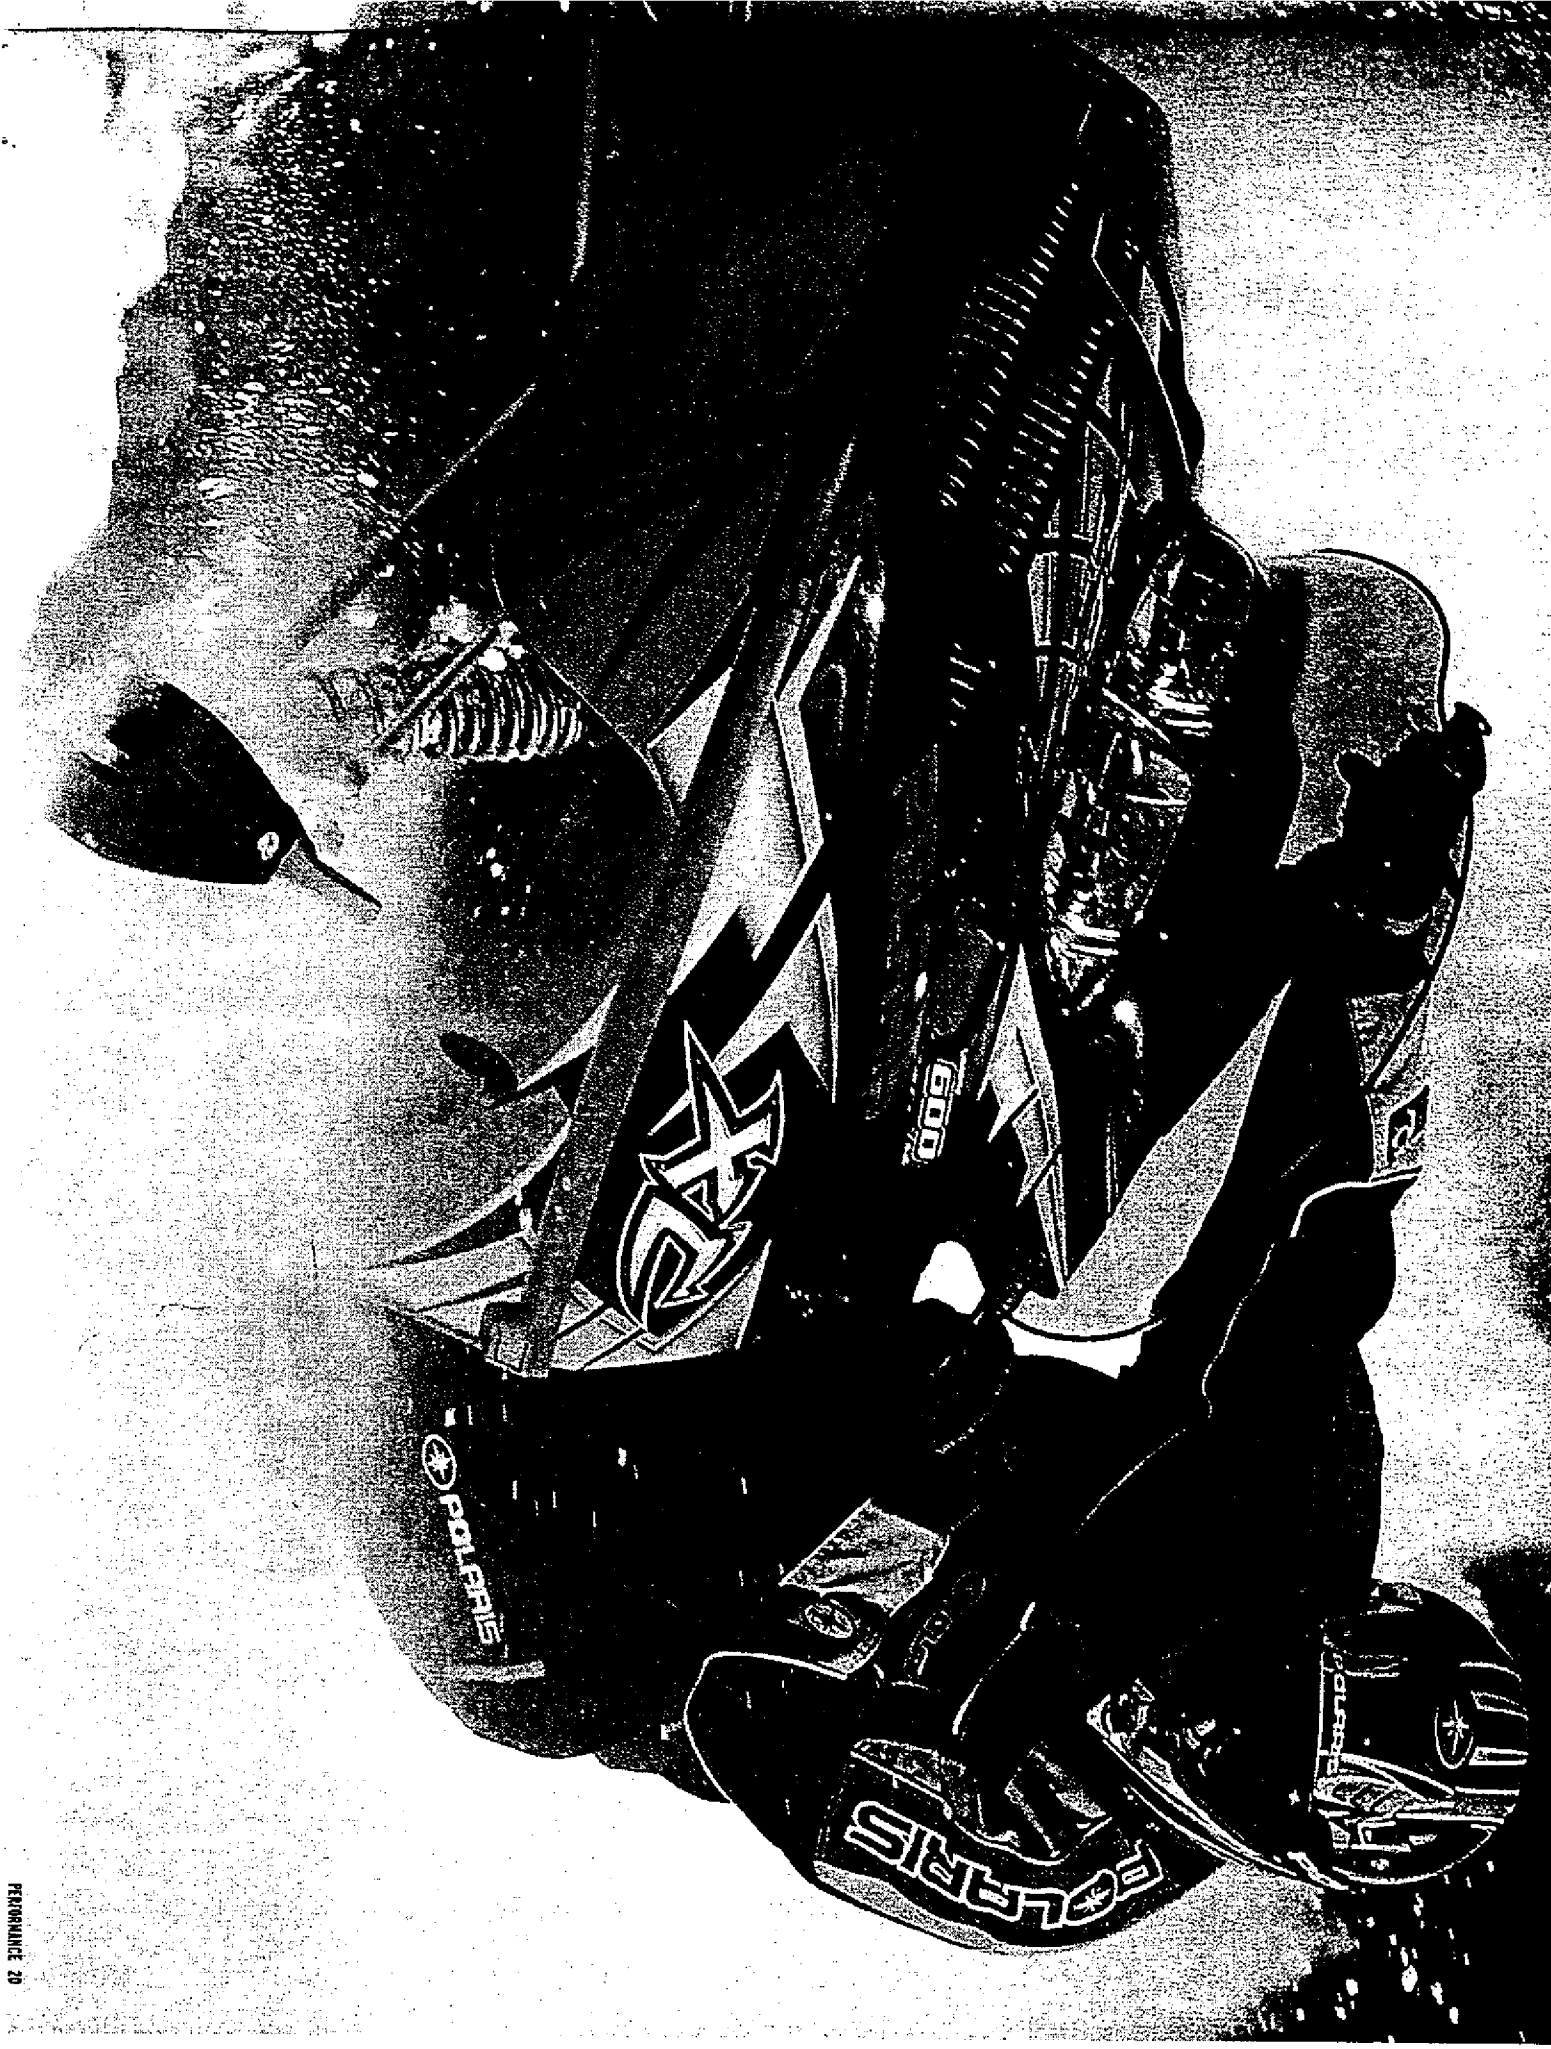

The 10 RMK Rear Suspension features our Dual Purpose Rail (DPR) with a deep snow-friendly approach angle and new, larger rear idler wheels. The new skid supports track lengths up to a monstrous 166" and vertical rear axle travel up to 18.5". New Ryde FX™ Multi-Port Valving smooth-ride, low-fade design shocks perform just as you want in either deep powder or hard, rough terrain.

RIDER FEATURES

The 900 RMK features Sidehiller™ 2 skis with a patented offset design, down-turned edge and deep keel with dual runners. This results in added flotation, extra bite when sidehilling and easy steering with virtually no darling. You also get Polaris Electric Reverse Control (PERC), which lets you move in reverse at the push of a button without the added weight of mechanical systems. New multi-function display. A powerful headlight directs a bright white pattern far down the snowpack, and Snow Beams™ direct light to the ski tips. An optional Projector Beam delivers locomotive-type intensity for unrivaled visibility.

PERFORMANCE

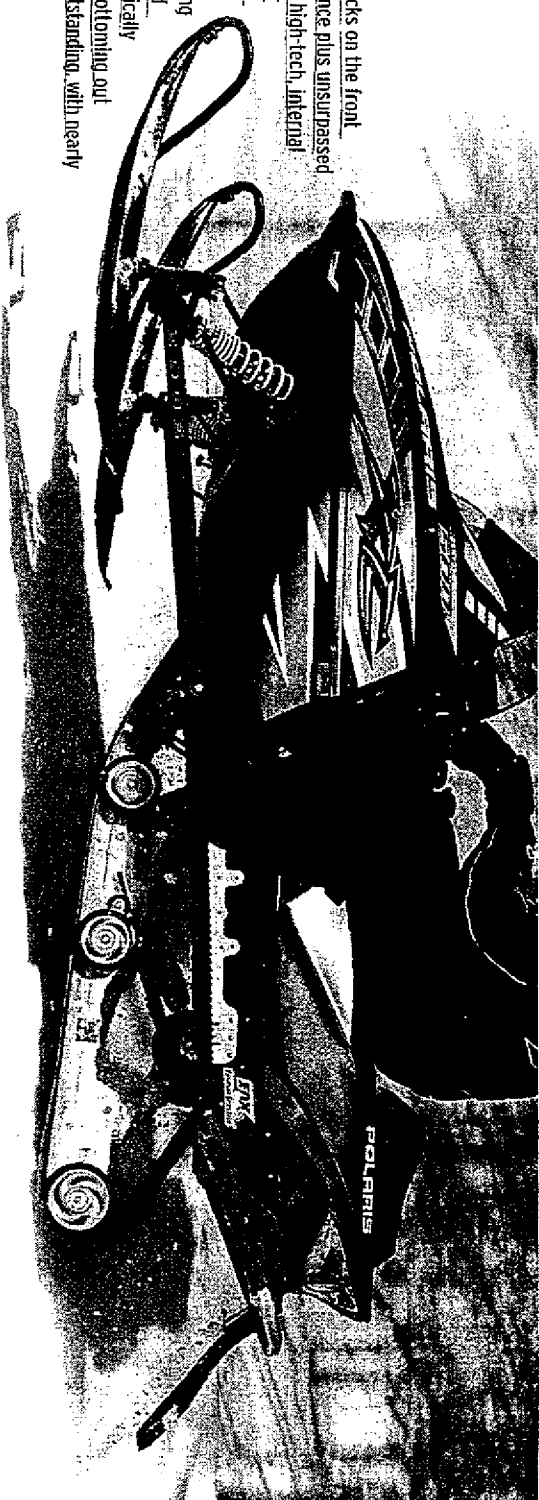

**THE FAST® M-10 REAR SUSPENSION -
STANDARD EQUIPMENT ONLY ON POLARIS SNOWMOBILES**

At the most common trail speeds, the fast® M-10 is the undisputed champ when it comes to ride quality. There is simply no substitute. The M-10 delivers 14" of travel and features a Full Range Adjuster (FRA) that lets you fine-tune the ride to your weight, riding style and trail conditions. Unlike traditional progressive-rate rear suspensions, M-10 is a digressive or "falling-rate" suspension. As the M-10 suspension compresses while going over a bump, the suspension becomes softer. The bigger the bump, the more plush it becomes. M-10 is available on select quantities of 700 and 800 XC Sps. See dealer for details.

FRONT AND REAR SUSPENSIONS MAKE SMOOTH WHAT ISN'T

Developed and tested in smogcross racing, Ryde FX gas shocks on the front suspension deliver 10.3" of travel with fade-free performance, plus unsurpassed bump absorption to handle even the biggest moguls. With high-tech, internal floating pistons, they're tunable and rebuildable. The EDGE rear suspension features a Ryde FX High Pressure Gas front-track shock and Fox® Position Sensitive rear-track shock. The Fox® PS3™ shock with remote reservoir (available during Snow Check Select) senses shaft position and velocity, and responds with the exact amount of damping. It automatically softens in the "ride zone," yet firms up instantly to avoid bottoming out or severely rebounding over big bumps. Ride comfort is outstanding, with nearly 14" of rear-axle travel that serious riders demand.

POWER MAKES THE PISTON IN THE CHEST BEAT FASTER.

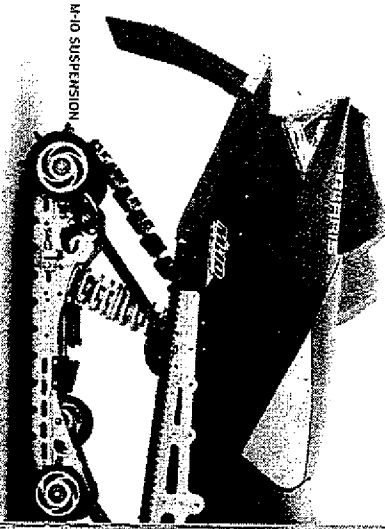

PEGGING THE ADRENALINE METER. THAT'S WHAT PERFORMANCE SNOWMOBILING IS ALL ABOUT. AND NOTHING SATISFIES LIKE THE XC SP™. THAT'S BECAUSE THIS IS THE ORIGINAL "GET ON AND GO THERE'S NO STOPPING YOU" SLED. EQUAL PARTS POWER AND STABILITY. CLIMB ON, SQUEEZE THE TRIGGER, AND OUR XC SP WILL STRAIGHTEN A TWISTY TRAIL, ACCELERATE YOU ACROSS A FROZEN LAKE AND DELIVER PROVEN PERFORMANCE ALL WINTER LONG.

THE ONE TIME WE'LL BACK OFF — POLARIS ELECTRIC REVERSE CONTROL

We never quit moving forward, even when it comes to reverse. So we equipped XC SP with PERC (Polaris Electric Reverse Control). It's perfect for times when you have to back out of a tight spot, off a trailer or out of a garage. Just push the button on the left-hand control block, and it electronically reverses the direction of the engine. But the real beauty of PERC is that it doesn't add weight like conventional mechanical systems.

ADJUSTABLE SEAT ADJUSTS TO YOUR STYLE

The Polaris Adjustable Seat System (PASS) offers the best seat in the house for every rider size and riding style. Standard on every XC SP, the backrest adjusts 5" forward and back in 1-inch increments. And for a little more flexibility, the seat offers this bonus: 30% more "lockable" storage room for all of your trail essentials.

SHOWN WITH FAST™ 14-10 SUSPENSION

600 XC SPTM

50TH ANNIVERSARY EDITION

600 XC SP 50TH ANNIVERSARY EDITION, MIDNIGHT BLUE METALLIC, 121" X 15" X 1.25" TRACK, HYDRE-FX COMPRESSION-ADJUSTABLE IFS SHOCKS AND FOX® PSS™ CLICKER REAR-TRACK SHOCK

800/500 XC SP

500, 600, 700 AND 800 XC SPs AVAILABLE IN BLACK/SILVER OR RED/WHITE COLOR COMBINATION

700 XC SP

THE 2004 700 XC SP WITH FAST* M-10 REAR SUSPENSION WAS CALLED "... THE BEST RIDING, EASY STEERING, FLATTEST CORNERING SLED WE'VE EVER RIDDEN" BY THE SUPERTRAX NO BULL BUYERS GUIDE, DECEMBER 2003
FAST* M-10 AVAILABLE DURING SNOW CHECK SELECT

BUILT ON 50 YEARS OF HERITAGE, FEW SNOWMOBILES CAN MATCH THE PERFECT BALANCE OF POWER, CONTROL, CONFIDENCE AND DEPENDABILITY OF OUR XC SP. POWERED BY OUR LEGENDARY LIBERTY POWERPLANT, THE XC SP IS THE BENCHMARK FOR RIDE, HANDLING AND ALL-DAY COMFORT. HANDS DOWN.

POLARIS LIBERTY ENGINE WITH VES

The proven performance and reliability of the Polaris Liberty engine is alive in every XC SP model. Liberty features Grafal-coated pistons as well as a patented Variable Exhaust System (VES) for increased low-end and mid-range torque, horsepower, fuel economy and reduced emissions. Liberty accommodates both premium and regular fuel, thanks to a fuel octane switch that adjusts the ignition timing to the grade of fuel to maximize performance and reliability. And Deformation Elimination Technology (DET) keeps the 700 and 800 out of trouble caused by cold mornings, low elevations, lean jetting or bad fuel. A Polaris roller driven clutch for smooth upshifts, flawless backshifts and improved belt life is standard on all XC SPs.

EDGE CHASSIS

Snocross-style wide running boards with boot grips add stability and control. Diecast aluminum bulkhead provides unsurpassed strength. Self-piercing rivets are 200% stronger than conventional rivets. And the Polaris Dual Angle Tunnel (DAT) aggressive tapered design creates greater rear-suspension travel without raising the center of gravity.

FRONT AND REAR SUSPENSION

The EDGE IFS features an industry-leading 10.3" of travel, thanks to the snocross-tested, bump-absorbing, fade-free performance of Ryde FX High Pressure Gas shocks. Controlled Roll Center (CRC) geometry and composite skis with aggressive carbide runners optimize steering for flat cornering. The fully coupled EDGE rear suspension boasts nearly 14" of rear-axle travel, and a Fox Position Sensive High Pressure Gas rear-track shock for the ultimate ride.

RIDER FEATURES

XC SP riders will benefit from our Polaris Electric Reverse Control (PERC), which offers easy push-button reverse without the weight penalty of mechanical systems. And hands and thumbs will stay comfortable, thanks to warmers conveniently adjusted from the left-hand control block.

DEEP SNOW

FLOTATION THAT GETS YOU UP AND KEEPS YOU GOING

When it comes to conquering mountains, there's one thing that matters more than anything. Flotation. It's a factor so important that we went to work studying every part of the machine to see how we could get it on top of the snow more efficiently. So if you examine the nose pan, you'll find it's extra wide with a shallow angle of attack. This design provides more surface area to help lift the Rmk to the top more effectively. Add in our patented Series 4 track, Sidehiller® 2 skis, tapered tunnel and Dual Purpose Rail (DPR), and you've got a sled built to excel in the steep and deep.

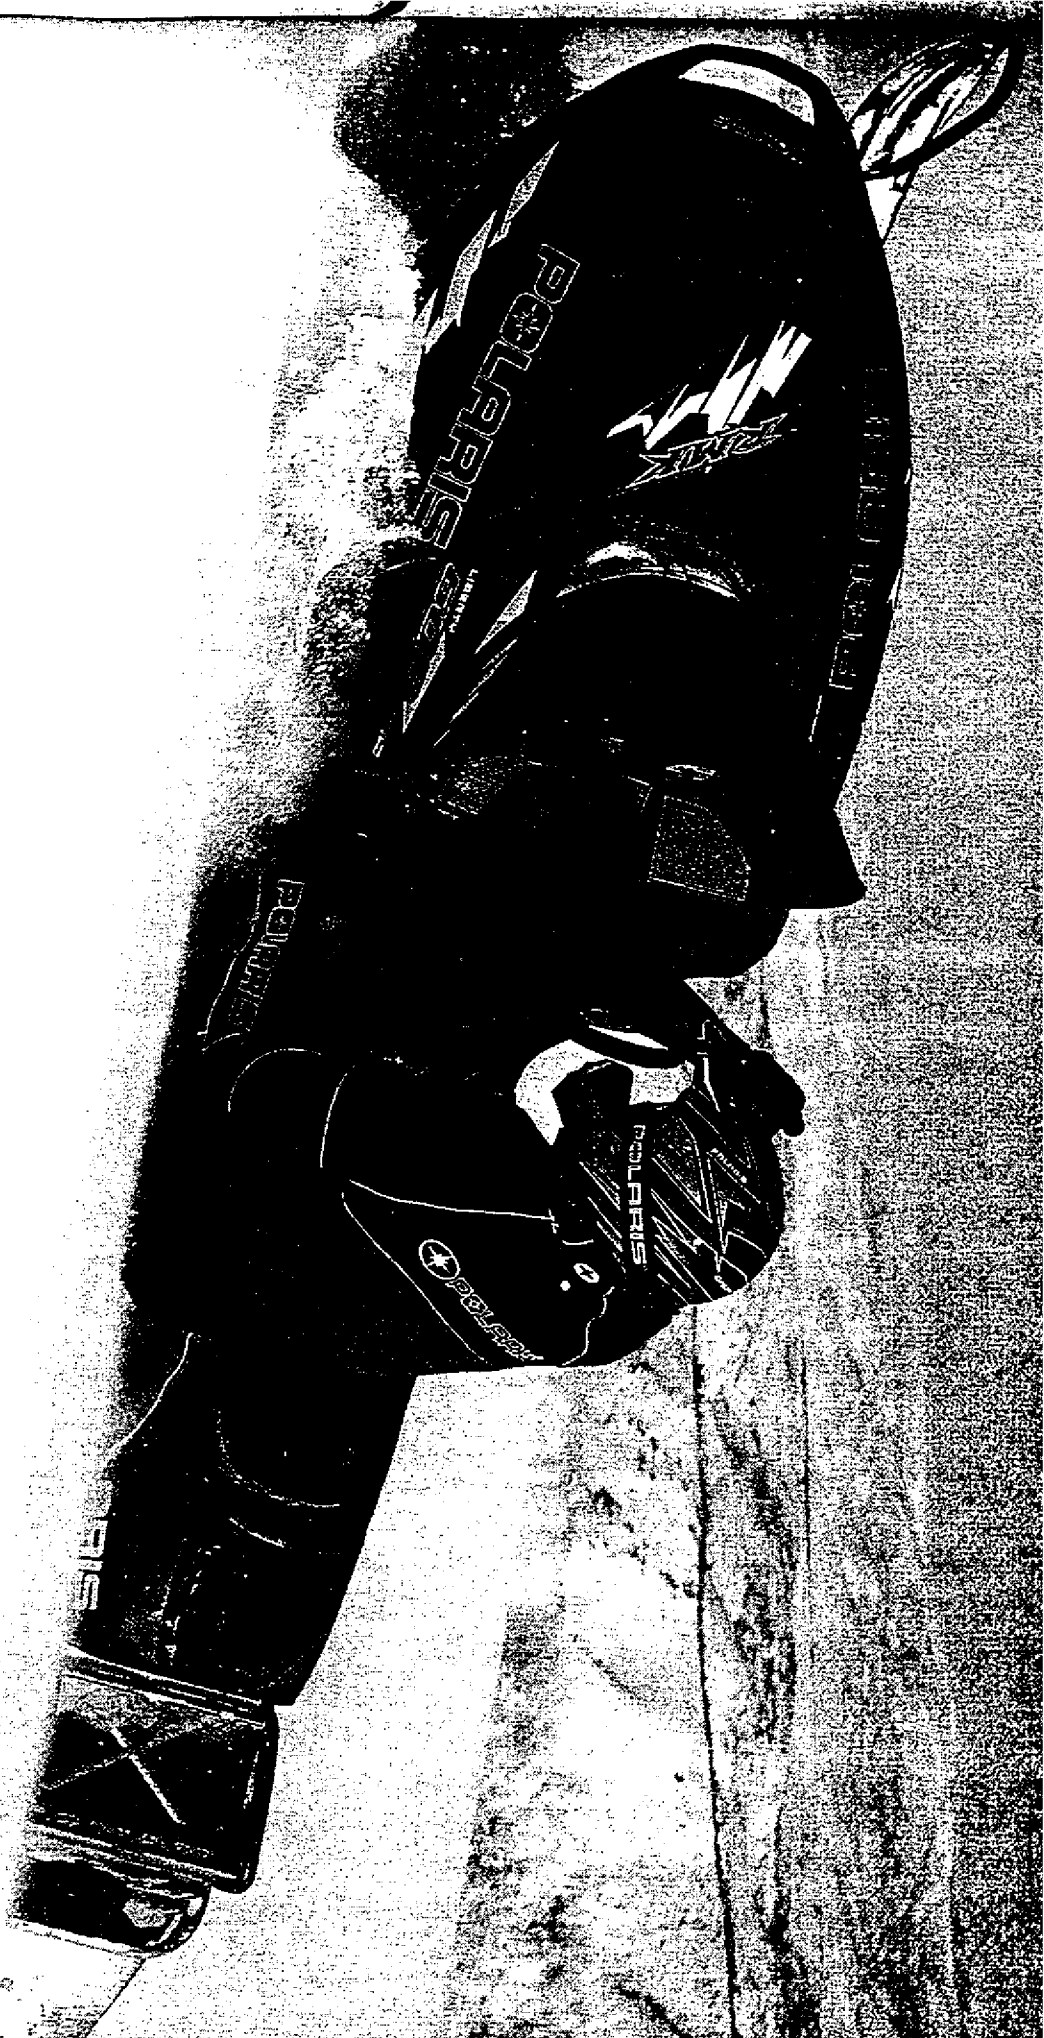

IT'S EITHER A MOUNTAIN SLED, OR IT'S AN IMITATION.

ASK ANYONE WHO HAS WATCHED FROM THE SIDELINES AT JACKSON HOLE, OR DECIDED TO LEAVE THE TRAIL BEHIND AND EXPLORE THE BACKCOUNTRY. THERE IS NO SUCH THING AS "PART" MOUNTAIN SLED. ONLY A PURPOSE-BUILT SNOWMOBILE CLIMBS TO THE TOP. ONE MADE FOR RUGGED MOUNTAIN TERRAIN AND DEEP POWDER SNOW. A SNOWMOBILE LIKE THE POLARIS Rmk. ENGINEERED WITH 100% GRIT, GUTS, MOUNTAIN KNOW-HOW AND THE CLIMBING TECHNOLOGY NO ONE ELSE CAN MATCH.

NARROW RUNNING BOARDS CLIMB BETTER

If there's one code to live by in the mountains, it's that hype is for city folk. Reduced drag in deep snow and easier sidehilling result from our unique narrow running board design. Combined with the Polaris Series 4 track, you get a deeper bite in deep powder without "hanging up" or experiencing track cavitation when climbing a steep chute.

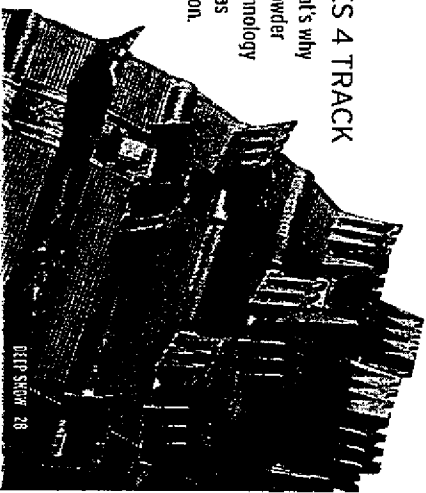

PATENTED PERIMETER COOLING SYSTEM

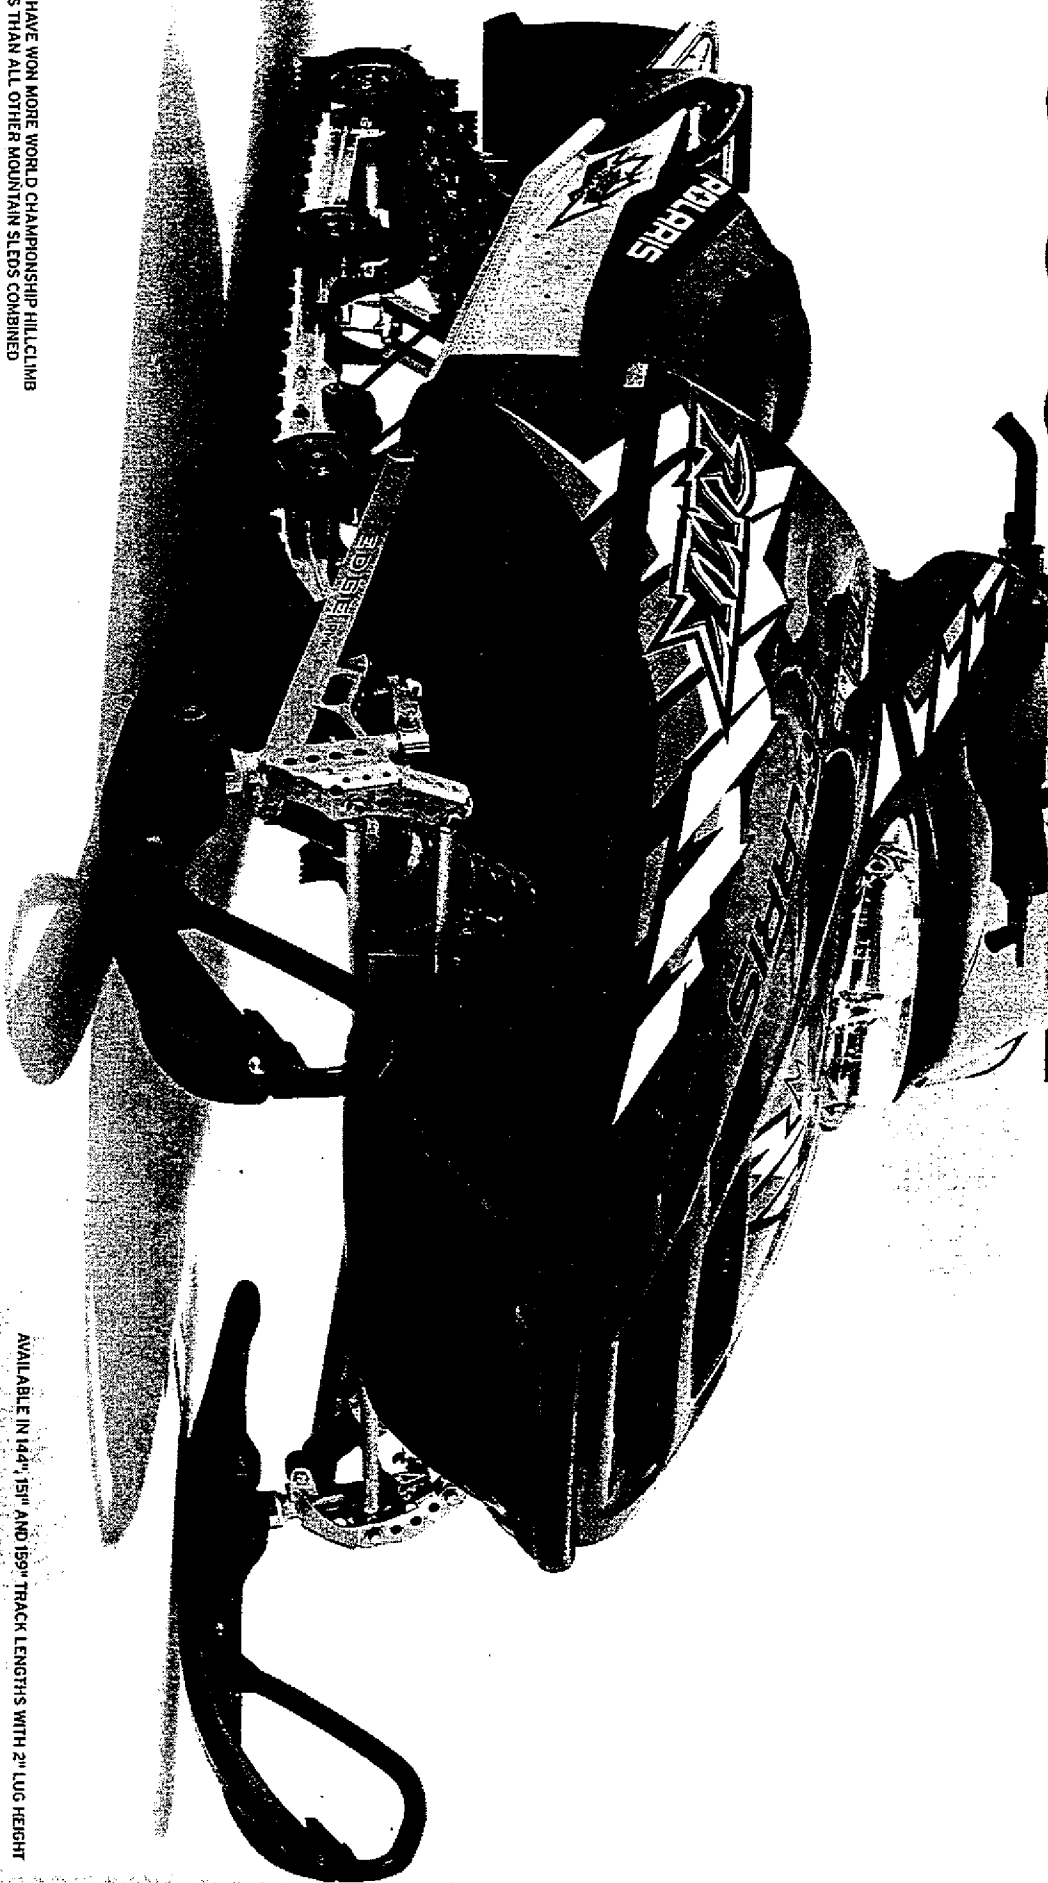

Our Perimeter Cooling System (PCS) is designed to keep engine temperatures in check by circulating engine coolant effectively and efficiently throughout the outer roll of the tunnel. Additionally, this same coolant warms the running boards and melts the snow and ice that typically build up on them. Not only does this feature reduce excess weight and drag from the running boards, it allows the extruded ribbed edge to grip your boots when sidehilling, providing uncompromised footing and stability.

WHERE THE RUBBER MEETS THE SNOW – THE SERIES 4 TRACK

Polaris understands there's plenty of fun to be had both climbing and on the trail. That's why we designed the Series 4 track for the 600, 700 and 800 RMK to work both in deep powder and on hard-packed trails. It's designed with a unique 2" lug with split-durometer technology featuring a stiff base for durability and outstanding performance on hard snowpack, as well as a soft, flexible tip to manage powder snow and deliver superior lift and flotation. The lug pattern is also staggered to provide maximum grip in all conditions, while running smoother and creating less vibration.

800 PMK[®]

AVAILABLE IN 144" TRACK LENGTH WITH 2" LUG HEIGHT

TRAIL RMK

AVAILABLE IN 136" TRACK LENGTH WITH 1.25" LUG HEIGHT

THE EDGE RMK CONTINUES ITS DOMINANCE OF THE WEST IN THE STEEP AND DEEP. WITH A FLOTATION QUOTIENTSM SUPERIOR TO COMPETITIVE DEEP SNOW SLEDS, THE RMK GETS SERIOUS CLIMBERS ON TOP OF THE SNOW AND ON THE TOP OF THE HILL, TITLE AFTER TITLE, YEAR AFTER YEAR. CROWNED "SLED OF THE YEAR" BY SNOWEST THREE OF THE LAST FOUR YEARS, POLARIS EDGE RMK MODELS CONTINUE TO EVOLVE FOR 2005 THROUGH SUPERIOR TECHNOLOGY AND REDUCED WEIGHT.

POLARIS LIBERTY ENGINE

Powering 600, 700 and 800 RMK models is the proven performance of the Polaris Liberty engine, known for delivering smooth and consistent power all day long. Liberty comes equipped with Grialat-coated pistons for durability and reliability. And it features a Polaris roller driven clutch that delivers a 3-5 mph track speed increase. Detonation Elimination Technology (DETTM) keeps Liberty 700 and 800 out of trouble caused by cold mornings, low elevation, lean jetting or bad fuel. And our patented Variable Exhaust System (VES) boosts low-end and mid-range torque and horsepower while offering better fuel economy and reduced emissions. Liberty accommodates both premium and regular fuel, thanks to a fuel octane switch that adjusts the ignition timing to the grade of fuel to maximize performance and reliability. The Trail RMK is powered by the Polaris 550cc fan-cooled powerplant, featuring a digital ignition system for superior overall performance and durability, cylinder reed induction for outstanding power at low and mid-range RPM, and an Altitude Compensating Carburetion System (ACCSTM) to ensure peak power delivery at any elevation.

EDGE RMK CHASSIS

Built to handle the deep powder, difficult climbs and monster moguls, the EDGE RMK is the most accomplished and versatile chassis on the mountain. It features the Polaris Dual Angle Tunnel (DAT) that delivers industry-leading rear-suspension travel without sacrificing a low center of gravity.

FRONT AND REAR SUSPENSION

The Polaris Dual Purpose Rail (DPR) is designed to deliver the agility of a short-track machine with the flotation and climbing prowess of a mountain sled. The rear suspension boasts up to 18.5" of travel (159" track), and features an Indyl SelectTM rear-track shock with a 300% compression adjustment range to fine-tune the ride for all conditions. The EDGE RMK fits with patented Sidehiller[®] 2 skis and dual carbide runners virtually eliminates darting and reduces steering effort on hardpack. In the deep stuff, the Sidehiller 2 ski's down-turned outer edge, deep heel and offset design add flotation and sidehilling control. Overall, the EDGE RMK suspension is 5 lbs. lighter.

RIDER FEATURES

Polaris Electric Reverse Control (PERC) lets you move in reverse at the push of a button, without the extra weight of mechanical systems. Adjustable handlebar hooks (600, 700 and 800) and flexible mountain bar help you maneuver and leverage your RMK when carving fresh powder or sidehilling to the top.

SHORT TRACK PERFORMANCE ON A LONG TRACK

Don't be fooled. The Switchback's 144" rear suspension features the Polaris Dual Purpose Rail (DPR). It angles up 2.8° behind the rear torque arm, giving Switchback a shorter wheelbase and lighter turning radius than competitive 136" designs. The result is superior agility on the trail. In addition, the greater length helps smooth out chatter bumps while providing unrivaled forward bite.

THE ONE TIME WE'LL BACK OFF -
POLARIS ELECTRIC REVERSE CONTROL

We never quit moving forward, even when it comes to reverse. So we equipped Switchback with PERC (Polaris Electric Reverse Control). It's perfect for times when you have to back out of a tight spot, off a trailer or out of a garage. Just push the button on the left-hand control block, and it electronically reverses the direction of the engine. But the real beauty of PERC is that it doesn't add weight like conventional mechanical systems.

CROSSOVER VERSATILITY IS A VIRTUE.

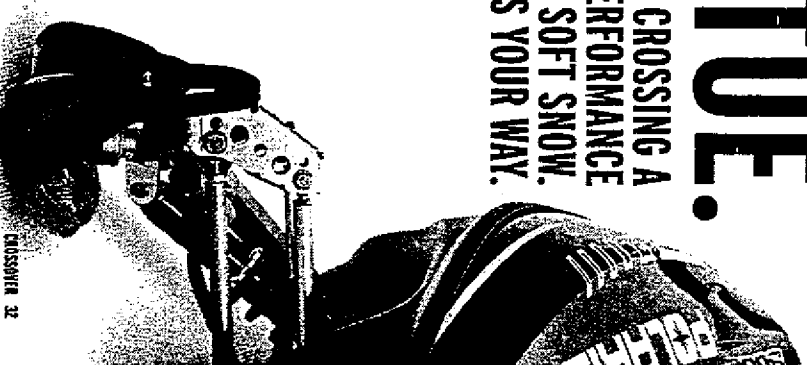

FUN IS WHEREVER YOU FIND IT. ON A TWISTED, WOODED TRAIL. POUNDING A DITCH, OR CROSSING A POWDER-LADEN MEADOW. SO WE DESIGNED A VERSATILE SLED WITH DOMINANT ENGINE PERFORMANCE. AND REVOLUTIONARY HANDLING THAT CAN TACKLE ANY TERRAIN YOU THROW AT IT. SOFT SNOW. HARDPACK. WHATEVER ADVENTURE COMES YOUR WAY.

PATENTED PERIMETER COOLING SYSTEM

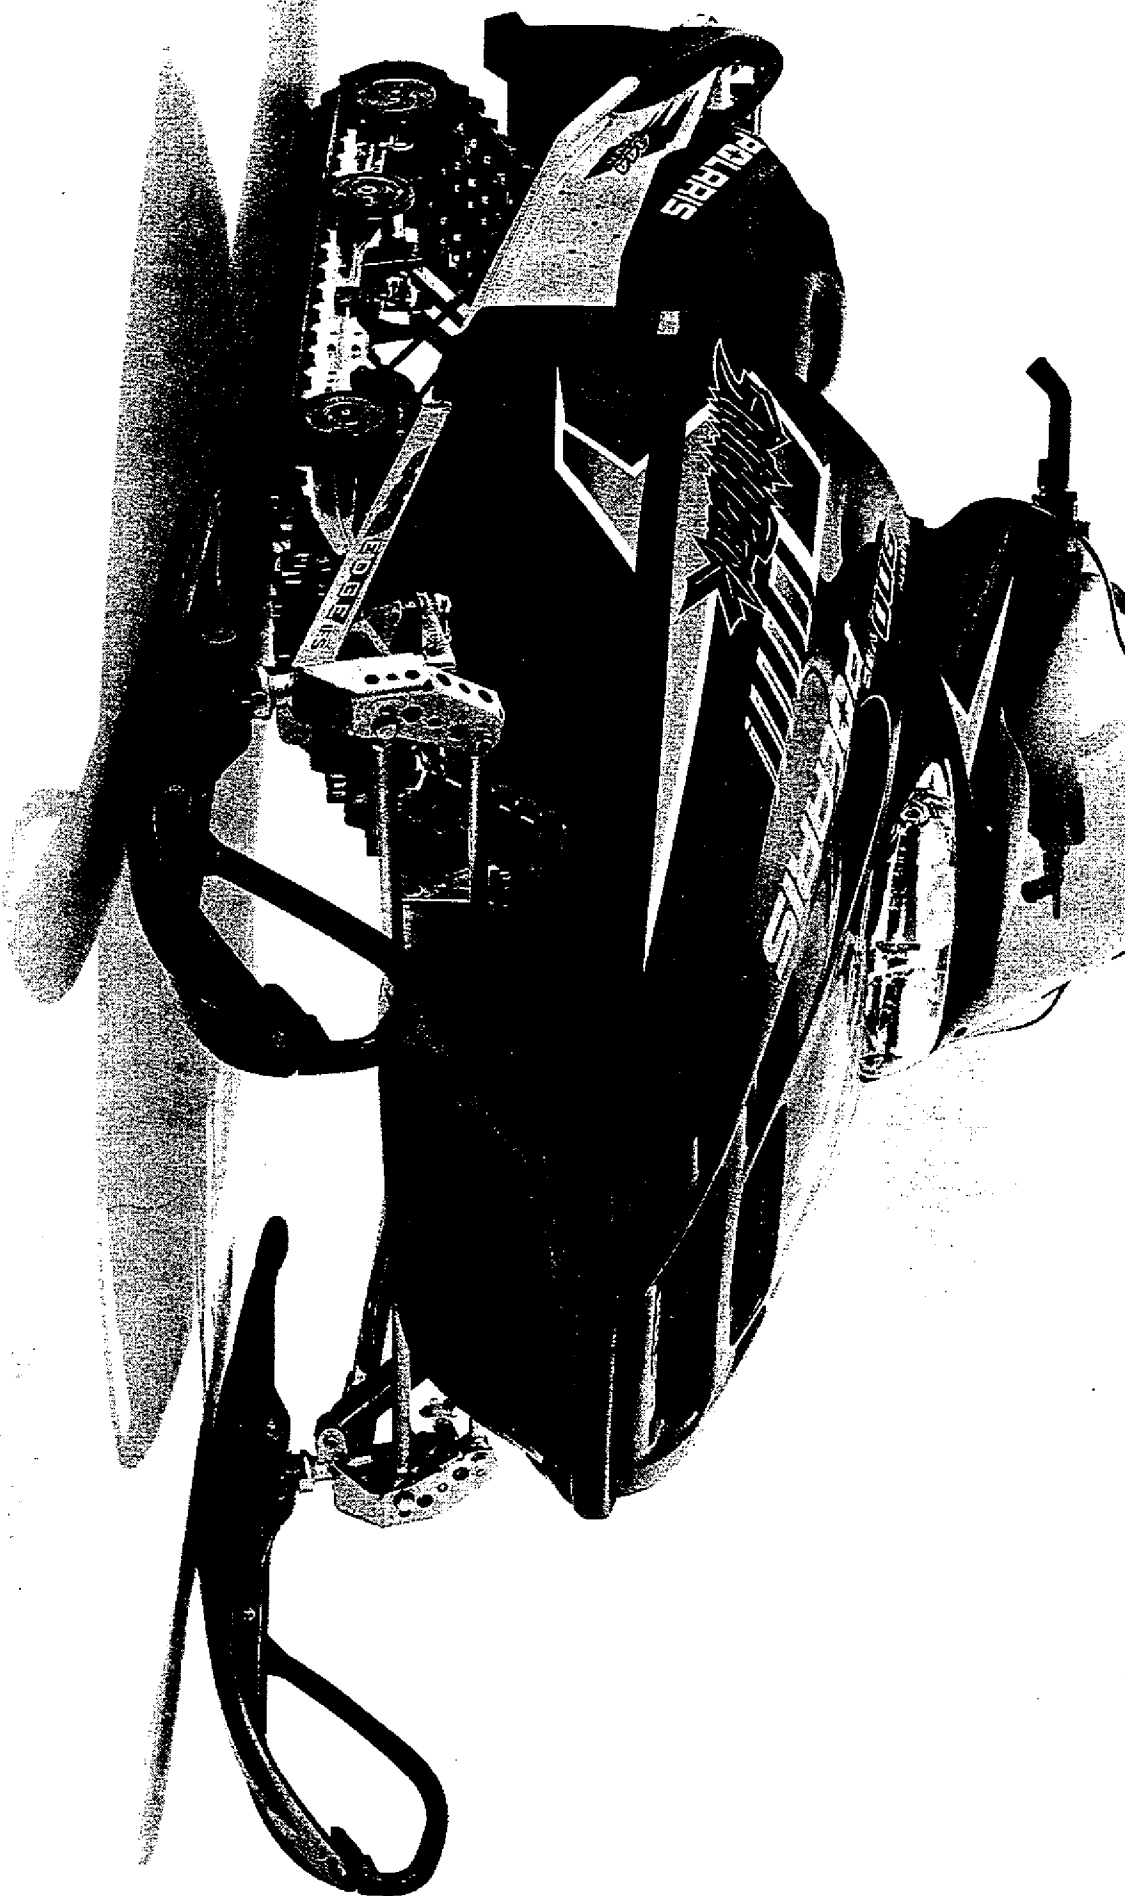

Although it's called a cooling system, PCS is also a warming system. The same fluid that keeps every Switchback's Liberty engine running cool also keeps snow and ice from building up on the running boards. The extruded, ribbed edge of the running boards also delivers uncompromised footing and stability.

SKIS BUILT TO PERFORM WHEREVER YOU WANT THEM TO PERFORM

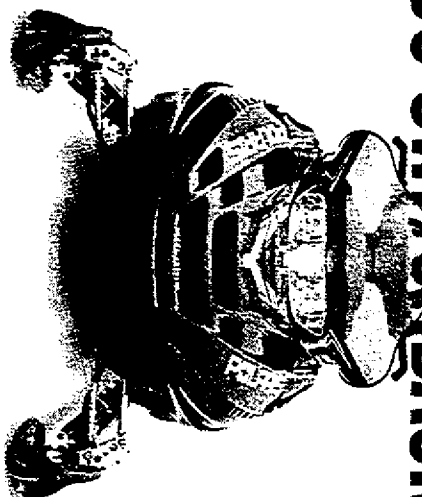

Switchback comes equipped with patented Sideliner 2 skis that feature a deep keel and dual runners for easy steering with virtually no darting on the trail. Run them in fresh snow, and the skis use their patented, down-turned outer edge for extra bite. Beyond that, the skis are offset for added flotation without added width. And you can adjust the ski stance from the factory-set 42.5" for precise trail handling to a narrow 41" for easier maneuverability in soft snow.

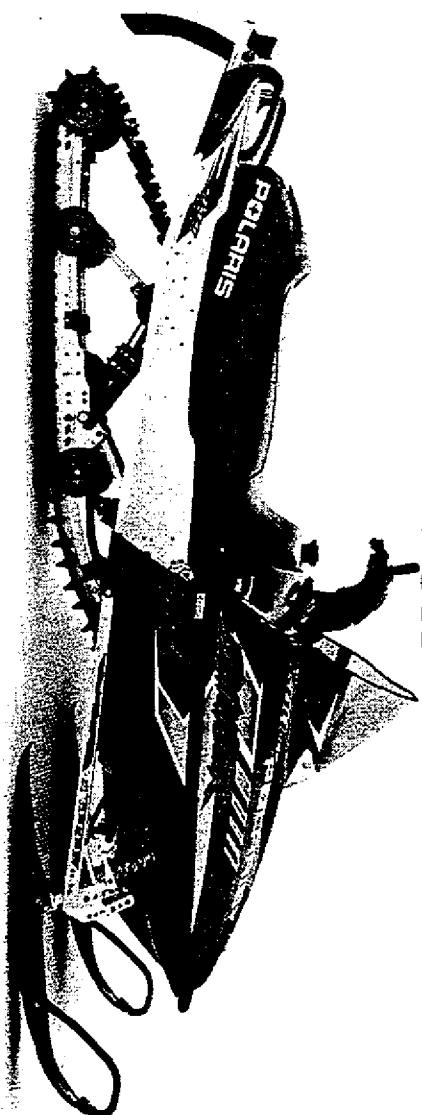

800 SWITCHBACK™

800 SWITCHBACK

600 SWITCHBACK

NO BOUNDARIES, NO LIMITS, NO COMPROMISE. WHETHER YOUR THIRST FOR ADVENTURE LIES ON THE TRAIL OR OFF, SWITCHBACK DELIVERS. ENGINEERED WITH POWERFUL VERSATILITY TO TACKLE A GROOMED TRAIL WITH INSPIRING CONFIDENCE OR A CLEARING OF FRESH POWDER WITH AGILITY, SWITCHBACK IS DESIGNED FOR THE ADVENTURE OF YOUR CHOICE.

POLARIS LIBERTY ENGINE

SwitchBack is powered by the proven performance and reliability of the Polaris Liberty engine. Liberty features Gralac-coated pistons for durability, a Polaris roller-driven clutch for smooth upshifts, flawless backshifts and extended belt life, as well as a patented Variable Exhaust System (VES) for increased low-end and mid-range torque, horsepower, fuel economy and reduced emissions. Liberty accommodates both premium and regular fuel, thanks to a fuel octane switch that adjusts the ignition timing to the grade of fuel to maximize performance and reliability. We improved engine cooling in the 600 by 40% with a new water pump drive gear. And Detonation Elimination Technology (DET) keeps the 800 stainless VES out of trouble caused by cold mornings, low elevations, lean jetting or bad fuel.

EDGE CHASSIS

The SwitchBack's EDGE chassis is highlighted by the Polaris Dual Angle Tunnel (DAT), an aggressive tapered tunnel for high ground clearance and maximum suspension travel. EDGE also features a higher handlebar position that makes sitting and standing easier. And the Perimeter Cooling System (PCS) with raised boot grips helps reduce ice buildup and provides sure footing.

FRONT AND REAR SUSPENSION

SwitchBack FS features an adjustable ski stance (41"/42.5"), Ryde FX High-Pressure Gas shocks, and Sidehiller 2 skis with dual carbide runners for confident control with virtually no darting. The rear suspension, with its 144" x 1.25" track, delivers an industry-leading 17" of rear-axle travel to soak up anything the roughest trail can dish out. A Ryde FX compression-adjustable rear-track shock adjusts with the simple turn of a dial to adapt to changing trail conditions or rider preference.

RIDER FEATURES

SwitchBack riders enjoy our Polaris Electric Reverse Control (PERC) that offers push-button reverse without the weight of traditional mechanical systems. Adjustable handlebar hooks, standard rear rack and flexible mountain bar help you maneuver and leverage your way when carving or venturing off-trail.

SHOWN WITH PURE
POLARIS ACCESSORIES

BUMP-FREE RIDING, COMPLIMENTS OF THE SMOOTHEST SUSPENSION EVER: THE FAST® M-10

At the most common trail speeds, the FAST® M-10 is the undisputed champ when it comes to ride quality. There is simply no substitute. The M-10 delivers 14" of travel and features a Full Range Adjuster (FRA) that lets you fine-tune the ride to your weight, riding style and trail conditions. Unlike traditional progressive-rate rear suspensions, M-10 is a depressive or "falling-rate" suspension. As the M-10 suspension compresses while going over a bump, the suspension becomes softer. The bigger the bump, the more plush it becomes. M-10 is standard on the 500 and 600 Classic.

**DUAL RUNNERS ON ACCU-TRAK™ 2 SKIS
DELIVER PREDICTABLE, CONFIDENT CONTROL**

The exclusive composite Accu-Trak 2 ski is designed with dual carbide runners that are positioned on a center keel so cornering is flawless and darting is virtually eliminated. This dual-runner design puts the control back where it belongs. With the rider.

TRAIL LUXURY

ONLY THE COMFORTABLE SURVIVE.

WE MADE SURE COMFORT WAS AT THE FOREFRONT OF DESIGN WHEN WE CREATED THE POLARIS TRAIL LUXURY LINE OF SNOWMOBILES. SKILLFULLY BLENDED WITH PERFORMANCE, HANDLING AND STYLE, THESE MACHINES ARE PLUSH AND POWERFUL. STYLISH AND SMART. LOADED WITH CONVENIENCE AND STABILITY.

CHANGING DIRECTION MADE EASY

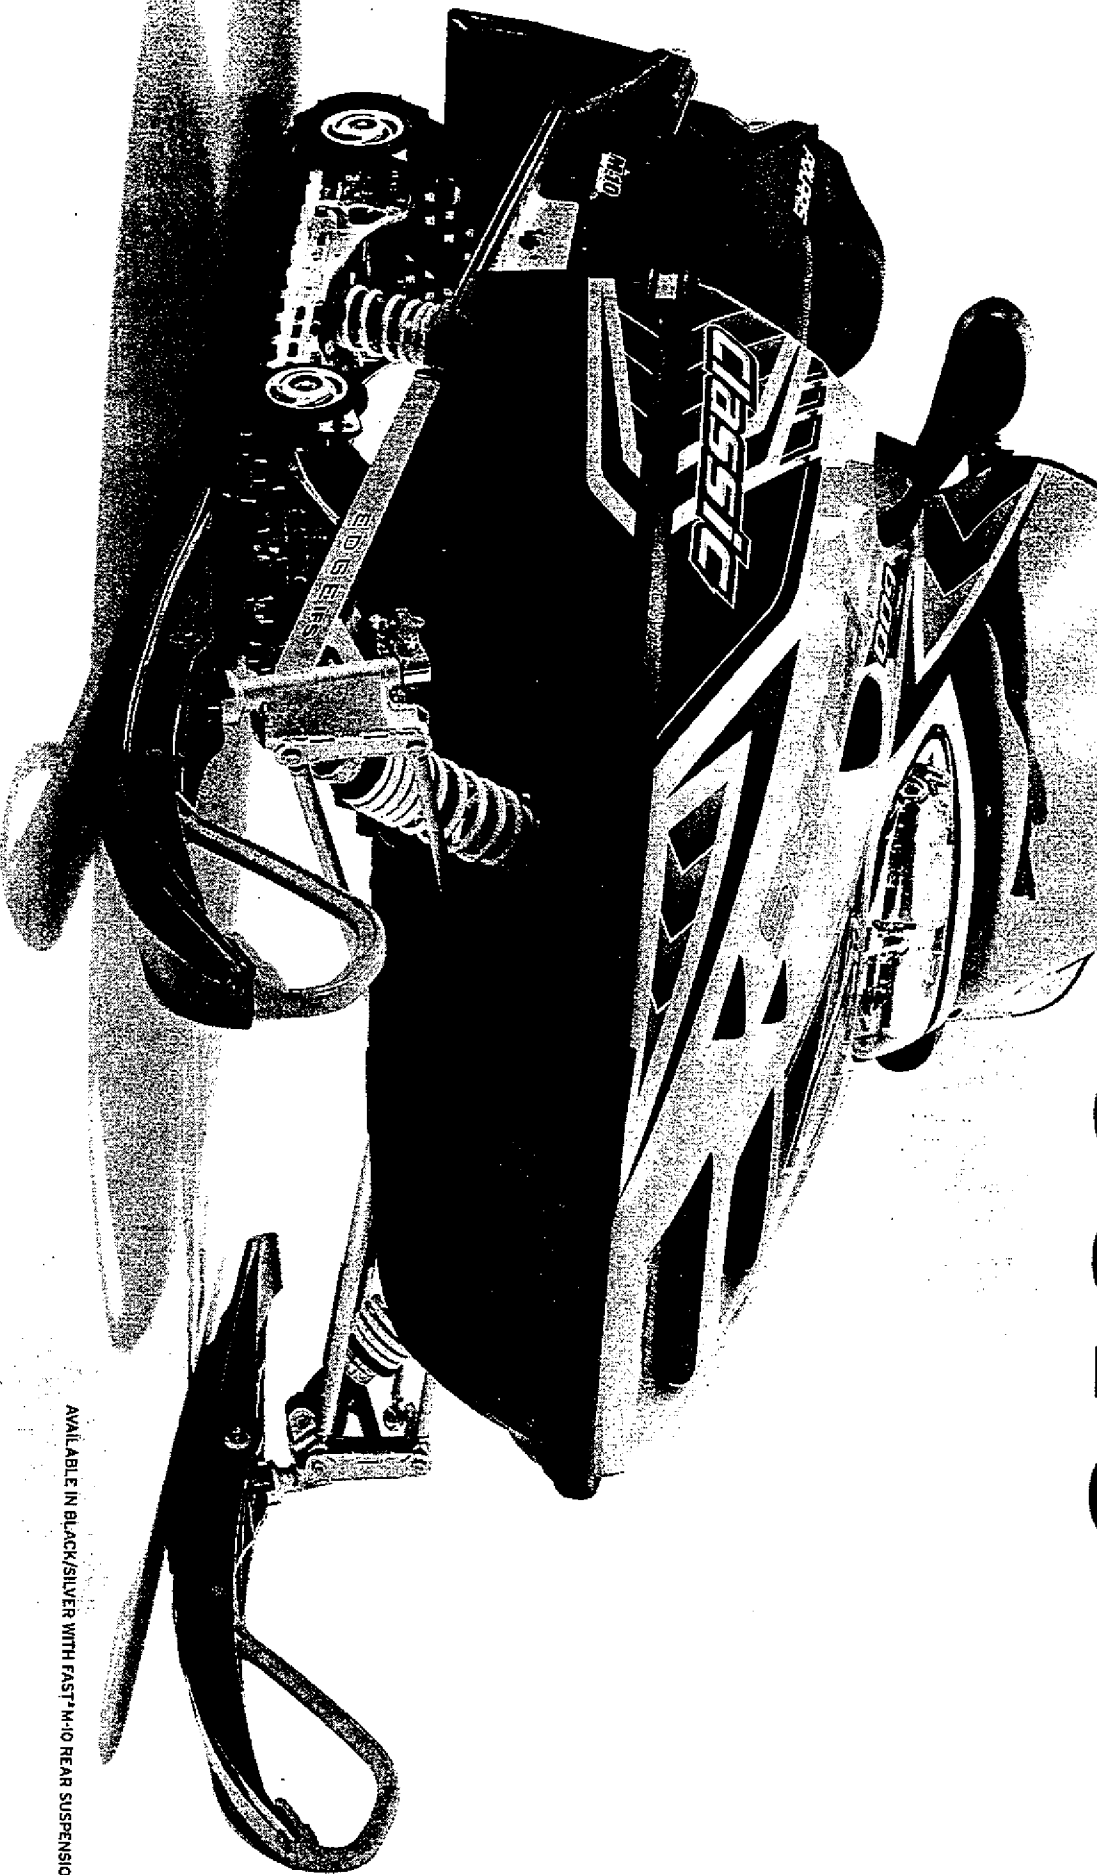

We equipped the 340, 550 and 600 Classic with PERC (Polaris Electric Reverse Control). It's perfect for times when you have to change direction on the trail, back off the trailer or out of a garage. Just push the button on the left control block and back up. Push the button again and head down the trail. It's that easy (500 Classic features Polaris mechanical reverse system.)

SEAT ADJUSTS TO YOUR SIZE AND YOUR STYLE

The Polaris Adjustable Seat System (PASS) offers the best seat in the house for every rider size and riding style. Standard on 500 and 600 Classic, the system allows the backrest on the seat to adjust 5" forward and back in 1-inch increments. And for more flexibility, the seat offers this bonus: 30% more "lockable" storage room to bring gear out on the trail.

SMOOTH, RELIABLE POWER UNDER THE HOOD. A SUSPENSION THAT DELIVERS SUPERIOR PERFORMANCE ON THE TRAIL. STATE-OF-THE-ART CONTROLS RIGHT AT YOUR FINGERTIPS. FULLY FEATURED, THESE ARE THE CLASSICS. BUILT WITH A NO-COMPROMISE ATTITUDE. DELIVERING ON THE PROMISE OF PERFORMANCE, CONVENIENCE AND SOPHISTICATED STYLING.

POLARIS LIBERTY ENGINE WITH VES

Powering the 600 Classic is the 600 Liberty engine. With proven performance and reliability, the 600 features the patented Variable Exhaust System (VES), which boosts low-end and mid-range torque and horsepower, optimizes top-end performance and improves fuel economy while reducing noise and emissions. The 600 also benefits from a fuel octane switch that adjusts the ignition timing to the grade of fuel to maximize performance and reliability. The 500 Classic is powered by the legendary 500cc Polaris liquid-cooled engine, which continues to deliver trouble-free performance. The 550 Classic and 340 Classic utilize Polaris fan-cooled engines with a digital ignition system for outstanding overall performance and exceptional peace of mind.

EDGE CHASSIS

EDGE features a more comfortable rider position, especially for long-distance rides, thanks in part to the PASS adjustable seat on the 500 and 600 models. A diecast aluminum bulkhead creates a lower center of gravity for more stability and flat cornering.

EDGE IFS AND FAST® M-10 REAR SUSPENSION

The smoothest setup in the industry starts with the acclaimed EDGE Independent Front Suspension (IFS). The 500 and 600 benefit from Indy Select compression-adjustable shocks with 300% range of compression adjustability, while the 340 and 500 feature Nitrox twin-tube shocks. All Classic models (except the 340) benefit from top-of-the-line Accu-Trak composite skis with dual carbide runners for precise handling and virtually no drifting. The 500 and 600 feature the Fast® M-10 rear suspension, the undisputed smoothest ride on snow. Not to mention 14" of plush travel, courtesy of Fox® gas shocks with a remote reservoir. The proven EDGE rear suspension is found under the 340 and 550.

RIDER FEATURES

All Classic models feature electric start, adjustable hand and thumb warmers, a 12 volt accessory plug-in for your GPS or phone, mirrors and an 11.8 gallon fuel tank for extended range. And a slightly taller, flared windshield provides increased wind protection. Polaris Electric Reverse Control (PERC) is standard on the 340, 550 and 600. Electric fuel gauge is standard on the 500 and 600.

THE POLARIS TOURING SEAT — COMFORT AND FLEXIBILITY

It simply doesn't get any more comfortable than this for one or two riders. The stylish Touring pillow top design has more support, a better fit and softens the ride mile after mile. The bucket-style passenger seat features our exclusive adjustable lumbar support. The seat can also be easily removed to provide expanded cargo space for your gear, our Pure Polaris accessory storage box or lockable Touring cover. You can even integrate our quick-release accessory bags and racks that work together seamlessly as a system to haul extra gear for trailside activities. Additional utility comes in the form of a standard tow hitch receiver. Attach the accessory tow hitch, and hooking up to sleighs and other towables has never been easier. Suddenly, you've got the ultimate sport utility sled.

TWO-UP TOURING

THE ODOMETER. THE ULTIMATE MEASURING STICK OF A SLED'S RIDE.

COMFORT IS WHAT IT'S ALL ABOUT WHEN IT COMES TO BUILDING THE ULTIMATE TOURING SNOWMOBILE. FROM PILLOW TOP SEATS AND PURPOSE-BUILT TOURING AMENITIES TO INDUSTRY-LEADING SUSPENSION AND ERGONOMICS, POLARIS TOURING SLEDS ARE DESIGNED WITH LUXURY IN MIND.

BEST REAR SUSPENSION IN ITS CLASS

EDGE Touring has combined the best aspects of Polaris technology, creating a revolutionary rear suspension with the widest range of load-carrying capacity, yet it delivers a consistently plush ride. The Ride Control Adjustment (RCA) allows you to adjust the rear-suspension geometry for maximum comfort and responsiveness, with industry-leading 15.2" of travel. The push-button FAST[®] M-10 ACE™ on the 800 Touring and 600 Touring 50th Anniversary Edition easily fine-tunes the rear suspension to exactly how you want it, from "soft" to "firm" — right from the driver's seat for ultimate comfort over any terrain.

ADJUSTABLE AMENITIES FOR YOU AND YOUR PASSENGER LITTLE THINGS THAT MAKE FOR A LUXURIOUS RIDE

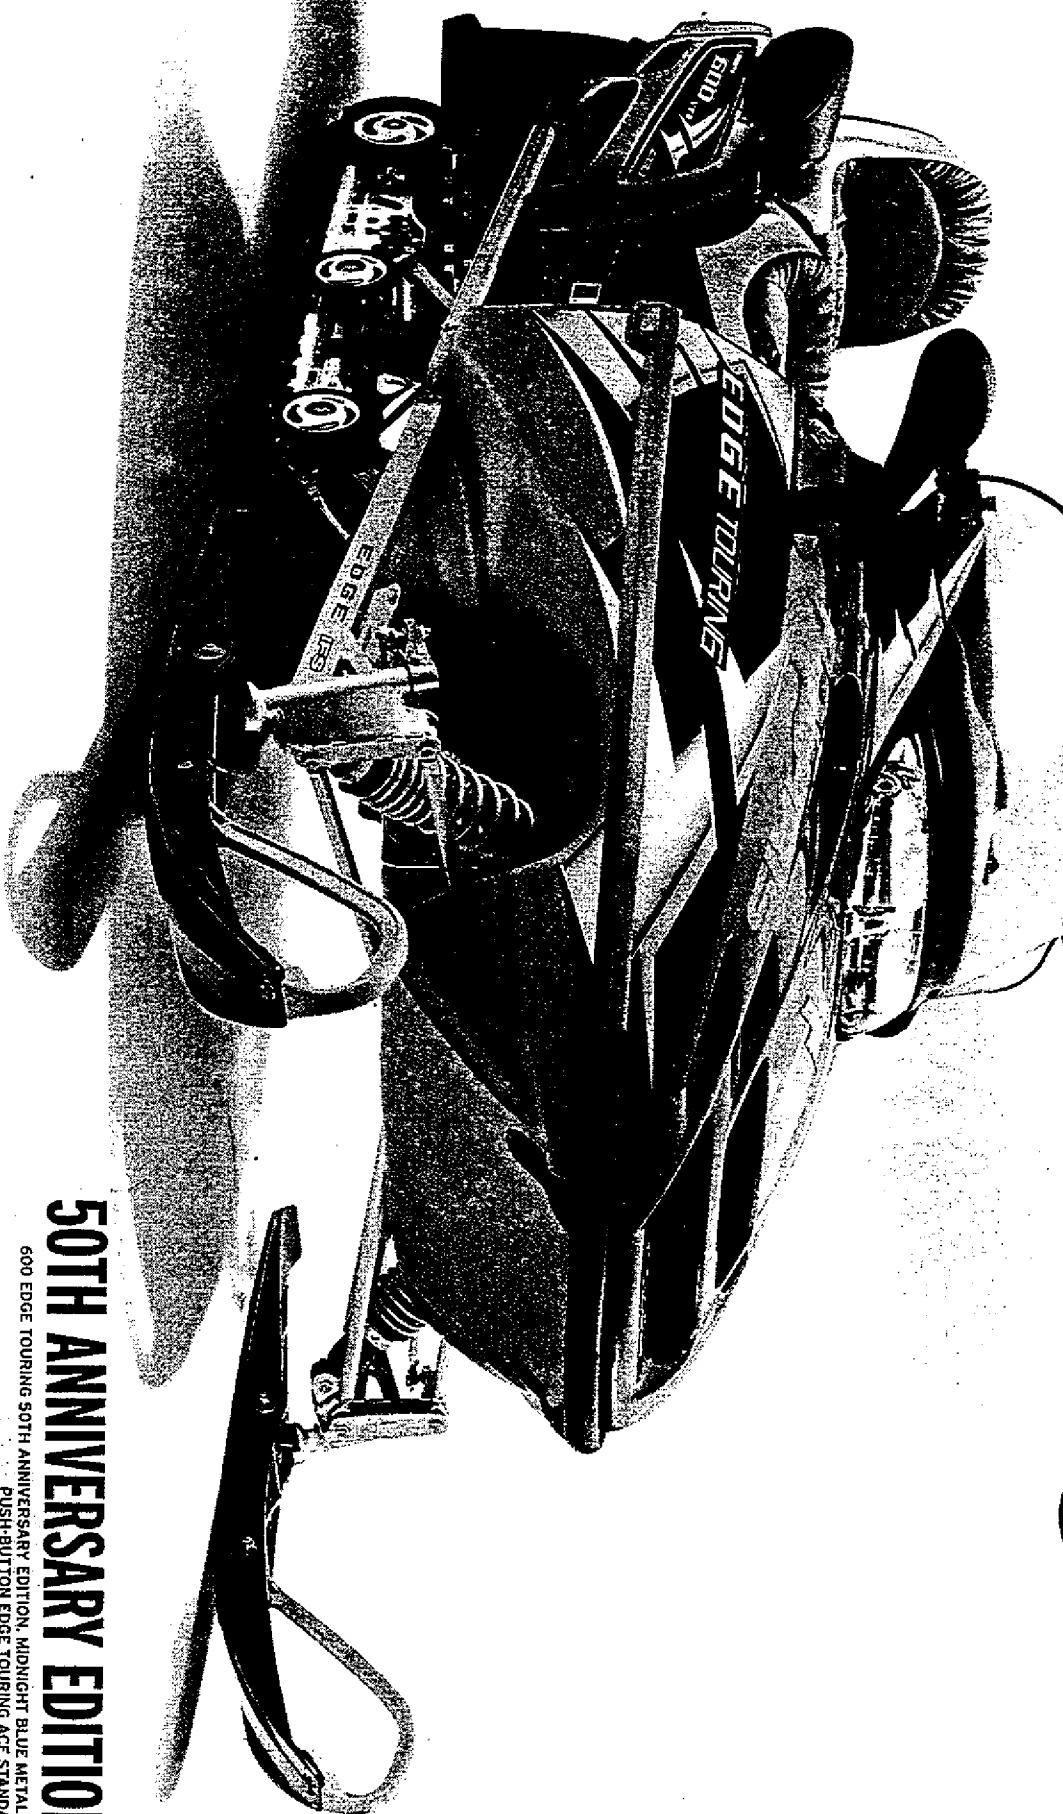

It's the extras that make a good ride great, so our Touring riders get the deluxe treatment. An adjustable lumbar support for the long ride. Most models include heated passenger handgrips with a hi/low switch, and wind-slicing, hand-warming gauntlets offer the ultimate comfort on the trail. Wide floorboards, adjustable passenger footrests and handholds complete the package. See specifications for model by model features.

PUSH BUTTON REVERSE

Push the button, and you're on your way. It's really that easy. We equipped most Touring models with PERC (Polaris Electric Reverse Control). It's perfect for backing out of a tight spot, off a trailer or out of a garage. Just push the button on the left-hand control block and back up. (The Frontier² Touring and WideTrak[™] LX utilize Polaris mechanical reverse systems).

BUILT FOR THOSE GOOD TIMES THAT ARE BEST SHARED. POLARIS TOURING MODELS ARE SPACIOUS AND COME STANDARD WITH POWER AND AMENITIES FOR TWO. AND TO SHOW THEIR VERSATILITY, TOURING MODELS EASILY CONVERT INTO UTILITY AND LUXURY RIDES MORE PERFECTLY SUITED FOR ONE. COMPLETE WITH MORE CARGO SPACE, MORE COMFORT AND MORE FEATURES THAT KEEP RIDERS GOING, TRAIL AFTER TRAIL. MILE AFTER MILE.

POLARIS LIBERTY ENGINE

The 600 and 800 Touring are powered by the industry's most proven performer: the Liberty liquid-cooled engine with Grafal-coated pistons for long life, and VES (Variable Exhaust System) - stainless steel in 800 Touring for smooth two-up power and increased fuel economy, plus reduced noise and emissions. The 800 also features our Detonation Elimination Technology (DET) to protect your engine from cold morning starts, low elevations, lean jelling or bad fuel. The Frontier Touring uses the EPA-compliant Polaris Liberty electronically fuel-injected 4-cycle engine that delivers up to 20-25 mpg at trail speeds. Start one up and you'll find the compact twin-cylinder, lightweight design offers great throttle response, quick starts, excellent fuel economy and smooth operation at any altitude or temperature. Trail Touring DLX, Trail Touring and 340 Touring are equipped with powerful, durable Polaris fan-cooled engines with digital ignition for outstanding performance and great fuel economy.

EDGE CHASSIS

The EDGE Touring chassis is the foundation of snowmobiling's most luxurious two-up ride. With our accessory system, you can easily transform EDGE Touring models from two-up sleds into stylish one-up cruisers or sport utility sleds with extra cargo capacity. All EDGE Touring models have a low hitch receiver for easy hookup to sleighs and other towables.

EDGE TOURING SUSPENSION

The EDGE Touring rear suspension delivers the widest range of carrying capacity available and 15.2" of rear travel for a consistently plush ride. Ride Control Adjustment (RCA) lets you adjust the geometry of the suspension to fine-tune your ride for maximum comfort and responsiveness. The EDGE IRS features an industry-leading 10" of travel and Controlled Roll Center (CRC) steering to keep the sleds solidly on the trail. Accu-Trak 2 skis (not available on 340 Touring or WideTrak LX) feature dual carbide runners for precise handling and virtually no drifting. The 340 Touring rides on the EDGE 136" rear suspension, with nearly 14" of travel for comfort and greater stability.

RIDER FEATURES

Because the extras help make the ride, most 2005 Touring machines come equipped with electric start, Polaris Electric Reverse Control (PERC), driver hand and thumb warmers, adjustable, heated passenger handgrips with gauntlet-style wind deflectors, electric fuel gauge, mirrors and a 12-volt plug-in. Touring riders of all sizes benefit from adjustable passenger footrests and wide floorboards for long-distance comfort. Individual model features vary. Please check specifications on page 79.

WIDETRAK LX

The WideTrak LX sports the reliable liquid-cooled Polaris 500 Twin, complete with hi/low range transmission and reverse. The proven, reliable Gen II chassis has a large under-seat storage area and rear cargo rack that provide plenty of room for gear and a low hitch for easy hookup to sleighs and other towables. The WideTrak LX features an independent Front Suspension (IFS) with Nitrex shocks and adjustable-coupling rear suspension that's designed to increase steering control when towing heavy loads.

EXCEPTIONAL RIDER COMFORT AND EASY HANDLING MAKE EVEN A BEGINNER FEEL LIKE A PRO

Designed for rider comfort, the EDGE chassis overdelivers. A diecast aluminum bulkhead offers more riding stability and uses self-piercing rivets that are 200% stronger than conventional rivets. It also positions the engine at a center of gravity for effortless handling. What's more, the fully coupled EDGE rear suspension, known for excellent weight transfer, soaks up stutter bumps and reduces kickback on rougher trails. Both the Polaris Indy 500 and Super Sport feature a Fox® Position Sensitive rear-track gas shock that automatically softens the ride in the "ride zone."

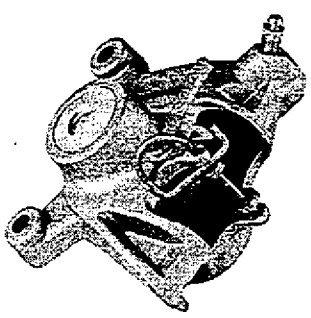

BEST VALUE IN A FULL-FEATURED SLED INCLUDING REVERSE
PERC (Polaris Electric Reverse Control) comes standard on the Super Sport and is perfect for times
when you have to back out of a tight spot, off a trailer or out of a garage. Just push the button
on the left control block and back up. Push it again, and you're on your way. It's that easy.

TRAIL SPORT/KIDS

A SLED SHOULD BE BUILT TO RIDE LIKE A MILLION BUCKS, NOT COST ONE.

THE DEFINITION OF "GREAT VALUE" IS BELIEVING YOU RECEIVE FAR MORE THAN YOU PAID FOR. THIS HOLDS TRUE FOR OUR
TRAIL SPORT FAMILY. WE NEVER SKIMP ON QUALITY OR FEATURES. IN FACT, YOU'LL FIND MANY OF THE SAME KEY COMPONENTS
WE USE ON OUR HIGH-PERFORMANCE XC SPS ON EVERY TRAIL SPORT SNOWMOBILE WE BUILD. RECENTLY, *SUPERTRAK* MAGAZINE
GAVE OUR TRAIL SPORT SLEDS THE TITLE OF "BEST VALUE. THESE SLEDS KEEP DELIVERING WHAT MOST SLEDDERS NEED."

SUPERTRAK, DECEMBER 2003

GOING IS IMPORTANT –
STOPPING EVEN MORE SO
High-performance Phantom hydraulic brakes mean
smooth, easy braking with minimal hand effort. Ideal
for beginners as well as veteran riders.

SNOCROSS-STYLE RUNNING
BOARDS ADD STABILITY
The Super Sport features the same wide running
boards found on the XC SP. Boot grips add to
outstanding rider stability and comfort.

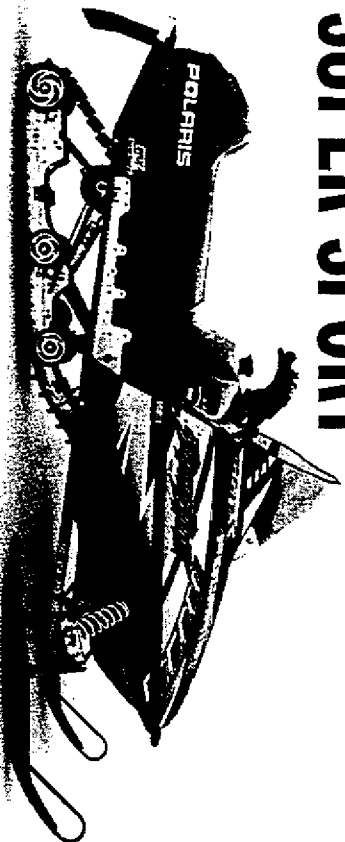

SUPER SPORT

"THE BEST VALUE... THE BEST RIDE WITH
THE MOST TRAVEL IN ITS SEGMENT." SUPERTRAX, DECEMBER 2003

POLARIS INDY 500

120 PRO X™

GET ON A SUPER SPORT OR POLARIS INDY 500, AND THERE'S NO DOUBT THIS IS THE ESSENCE OF SNOWMOBILING. PURE SLEDDING FUN. BUILT FOR KICKS ON THE TRAIL. A NO-ONSENSE DOSE OF THE SPORT. IT COMES LOADED WITH THE QUALITY TO KEEP YOU ON THE TRAILS. ALONG WITH THE KIND OF STANDARD FEATURES THAT BRING OUT THE BEST IN EVERY RIDER.

ENGINES

The Polaris Indy 500 comes equipped with the proven Polaris liquid-cooled Polaris 500cc twin. Known for its durability, this legendary powerplant delivers consistently smooth power and super-crisp throttle response. The Super Sport features a Polaris 550cc fan-cooled engine with digital ignition that delivers reliable performance, plenty of power, plus the added benefit of excellent fuel economy.

EDGE CHASSIS

A diecast aluminum bulkhead offers more riding stability and uses self-piercing rivets, which are 200% stronger than conventional rivets. Super Sport has snocross-style wide running boards with boot grips for added stability and control.

EDGE FRONT AND REAR SUSPENSION

The EDGE front suspension delivers 10" of travel and features Controlled Roll Center (CRC) steering geometry for sharper handling, confident cornering and greater stability. The fully coupled EDGE rear suspension boasts nearly 14" of travel, Nitrex RS shocks and a Fox® Position Sensitive rear-track gas shock.

RIDER FEATURES

The Super Sport features the convenience of PERC (Polaris Electric Reverse Control).

ONCE YOUR KIDS CATCH SIGHT OF THE 120 PRO X, THEY'RE HOOKED. GOVERNED TO 8 MPH AND LOADED WITH SAFETY FEATURES, THE 120 INTRODUCES YOUR KIDS TO SNOWMOBILING IN A CONTROLLED MANNER. BEFORE YOU KNOW IT, THEY'LL MATCH YOUR PASSION FOR SLEDDING DOWN THE TRAIL WITH FRIENDS AND FAMILY.

The 120 PRO X has a bulletproof 120cc 4-cycle overhead-valve engine for smooth, clean-running power. The 120 PRO X has lightweight, corrosion-resistant construction that makes it the lightest sled in the class. It also has the most travel in its class - 3" in front and 7" in back - for a stable, comfortable ride. Safety features include a key ignition, shutoff leather, handlebar shutoff button, hood-activated shutoff and orange safety flag. You even get under-seat storage and a rear-axle foot guard to keep your little ones safe and sound.

THE BEST WAY TO MAKE GEAR FOR RIDING IS TO RIDE. TO SEEK OUT
CONDITIONS MOST PEOPLE CAN ONLY IMAGINE. AND TO MAKE SURE
WE HAVE AN EAR-TO-EAR GRIN FROZEN ON OUR FACE THE WHOLE
TIME. THE TRUE TEST OF GREAT GEAR WILL ALWAYS BE MEASURED
BY THE SIZE OF THAT SMILE. **PURE POLARIS**

TRAIL RIDER APPAREL AND ACCESSORY SYSTEM A LITTLE TOO MUCH COMFORT NEVER HURT ANYONE.

When the time comes to get out into the world, climbing the trails and taking in what Mother Nature has to offer, nothing should get in the way of the experience. So we went to work building outerwear and accessories that put comfort and convenience at the forefront. We constructed a special line of apparel that's packed with features like extra-thick insulation, large amounts of storage and superior venting. All designed to perfectly match our line of touring snowmobiles. Now that's the ultimate trail experience.

ICE AND SNOW RIDER APPAREL AND ACCESSORY SYSTEM IT TAKES A MOUNTAIN RIDER TO KNOW A MOUNTAIN RIDER.

When it came to designing the ultimate deep snow machine, we looked to the only people we rightfully could - mountain men. When it came to designing our Western gear, we looked to rodeo riders from throughout Montana. With 25 years of experience behind him, he made sure that the details mountain riders look for were included in the jacket and bib. Strong jackets that are waterproof and breathable. Liners that can be worn alone or with a shell. Bibs that even have silicone grips for climbing and a harness for keeping the bibs on your shoulders, not off.

ATTITUDE SHOULD ALWAYS COME WITH THE GOODS TO BACK IT UP.

Every piece of our performance apparel system is built with the same performance-hungry gear as our XC SP line of snowmobiles. Give them a try while on the track or out testing up a trail, and you'll see. They're constructed with things like built-in armor and protection, maximum ventilation, advanced venting, convertible zip-out thermal insulation and a fit designed to make the ride better. All-in-all, the perfect complements for a machine that lives to go as much as you.

DON'T WORRY ABOUT YOUR MOTO-STYLE HELMETS, WE'VE GOT IT COVERED.

Highmarking a 12,000 foot peak or blasting across a frozen lake is totally different from gently cruising a flat trail. Open-faced helmets are perfect for aggressive riders and powder hounds. These moto-style helmets offer better protection from hard impacts, plus they're lighter with an increased field of vision. Use them with Dual Lens goggles for anti-fogging.

a) 50TH ANNIVERSARY MOTO HELMET

THE COLD CAN BE AS BITTER AS IT LIKES.

When the snow experience you choose is one of pure acceleration, there's nothing better to have along for the ride than Pure Polaris performance jackets. Pure Polaris jackets are made to accommodate a variety of riding conditions. Our waterproof, breathable technology along with matching graphics gives you the ultimate ride. And best of all, they're designed to match the factory colors of your Polaris sled. So you get the full-blown snowmobiling experience, as only Polaris can deliver.

a) FUSION JACKET

Designed with racing in mind, its nylon shell is treated with a waterproof and breathable coating. The thermal liner zips in or out to match your riding conditions. Full vents, pre-curved arms, and adjustable wrists and waist for comfort.

PILE ON THE LAYERS TO KEEP THE COLD OUT.

Keeping your core at a cozy 98.6° is all in the layers you choose. Base layers designed to quickly wick moisture from your skin. Fabrics that breathe to manage moisture, so you don't get clammy. Outer layers that keep the right amount of heat in, but with a way to let the excess out. In short, with the right layers, the cold can search all it likes, but it won't find a way in uninvited.

Black #2854303

i) GORE-TEX® INSULATED BIB

Delivers top-of-the-line wetness protection and ample warmth with a waterproof, breathable Gore-Tex® shell in the knees and seat. You'll also have added snow protection from the elasticized inner cuffs at the ankles. The front-pull zipper makes putting them on and taking them off easy.

Mens Sizing S-XL \$369.99 \$549.99 CAN
Mens Sizing XLT-2XL \$406.99 \$604.99 CAN
Black #2853207

j) ZIP-FRONT MVT INSULATED BIB

Teflon® finish and MVT fabric coating make it waterproof, yet breathable. Adjustable suspenders have quick-release buckles for easy on and off.

Mens Sizing S-XL Regular/Short Tail \$99.99 \$279.99 CAN
Mens Sizing XLT-5XL \$219.99 \$307.99 CAN
Black #2854207

k) VERTICAL EDGE MVT BIB WITH REMOVABLE LINER

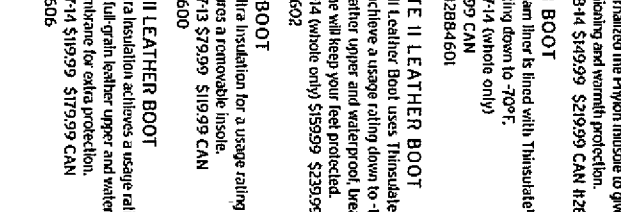

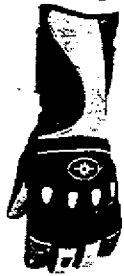

Vertical Edge MVT Bib allows you to pull the insulation out for warm days and put it back in on the cold ones. MVT-coated fabric, taped seams and waterproof zippers completely keep wetness out.

Mens Sizing S-XL \$229.99 \$329.99 CAN
Mens Sizing XLT-3XL \$252.99 \$362.99 CAN
Black #2854204

YOU CAN ONLY HAVE AS MUCH FUN AS YOUR FINGERS AND TOES LET YOU.

That's why this gear's made for the extremes. Linings that keep your digits warm way below zero. Durable materials like leather and nylon. Waterproof, breathable membranes. Put to the test in places so remote the sun doesn't even bother to shine there for months at a time. Why? Because when you're 40 miles from the nearest trailhead, 50 miles from the middle of nowhere, you want to make sure your fingers and toes are just as happy to be there as you are.

a) COMPETITION LEATHER GLOVE
Made from premium top-grain leather and Thinsulate™ insulation. The palm is double layered and seamless. Men's Sizing S-2XL \$69.99 \$99.99 CAN
Black/White (shown) #285551L, Red/Black/White #285551S, Blue/Black/White #2855516

DO MORE WITH THE POWER AND PROTECTION OF STARCARD

Once you're ready to order, don't miss your chance to get a Polaris StarCard. The Polaris StarCard provides you with quick, easy and affordable access to the Way Out, just the way you like it: with low monthly payments. And be sure to ask your dealer about the great financing options that come with the power of StarCard. Protect your investment with POLARISAR Protection Plus, comprehensive coverage for all Polaris trademarked systems that are designed specifically for Polaris snowmobiles. And it's only available from Polaris. It's not just smart, it's like having your own dealer riding along beside you. So make every ride worry free, don't forget to include a service contract with your Polaris purchase.

NOTHING FITS BETTER THAN THE ORIGINAL

After spending five decades towing sleds around the country, we know what it takes to make a cover that stands up to road abuses. Canvases that won't rip to shreds with the first sandblast from a passing semi. A reinforced handlebar area. Extended front air dam to keep the road's kick ups off your sled's finish. An elasticized system that knows and follows every nuance of your sled's shape. A cover that couldn't be made by anyone else.

Rugged army duck canvas

Reinforced handlebar area

Adjustable handlebar/windshield strap

UV resistant and water repellent

Fade and mildew resistant

Heavy-duty stitching throughout

Excellent coverage of suspension

OVERBUILT IS A GOOD PLACE TO START.

Bags don't come any better than this. Tough, ballistic nylon. Urethane coated for water resistance. Extra-reinforced seams. And a fit that only Pure Polaris can provide. With bags like this, the only thing left to do is to get on your sled and go. Semi-rigid construction for added protection. Easy-to-install hood and strap system. A simple, smart add-on for the serious trail rider.

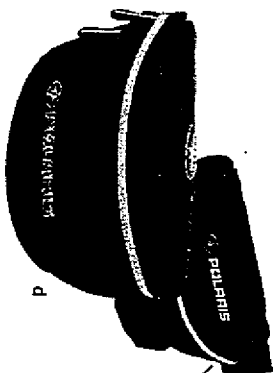

Great for sunglasses, wallets and other little must-haves for the ride.

Straight from car trunk to sled saddle in seconds flat.

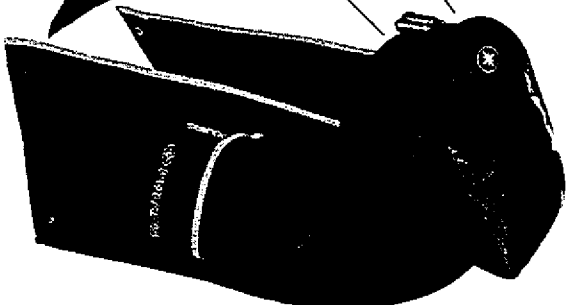

Clear Map Pocket for easy, on-the-fly reading.

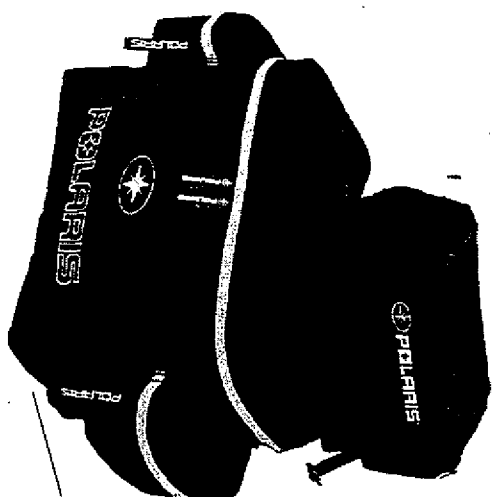

Perfect for keeping your camera close at hand.

Quickly slash extra layers of clothing.

Clear Map Pocket for easy, on-the-fly reading.

Convenient extra storage. Custom-fitting bag for RMK machine. 2 compartments.

Bring along everything except the kitchen sink for a long day on the trail.

A FORECAST IS JUST A METEOROLOGIST'S BEST GUESS.

We make windshields you can change as quickly as the weather. Wind tunnel-tested for aerodynamics, formed from thick polycarbonate. Five different heights from a low-drag 9" to the weather-blocking 17" touring model. Sled-matching custom graphics. And with their quick change time, if the weather decides to change, you can too.

SPEED IS GOOD. SPEED THROUGH TURNS IS BETTER.

In snocross, you have to be ready to turn the same way you ride—fast. That's why the Polaris Snocross ski comes with a wide ski tip to get the ski out and on top of the snow. And a unique keel design for aggressive handling and to reduce darting. As always, the race is won or lost in the corners.

a) SNOCCROSS SKI

Our racers love them, and so will you! Our plastic Snocross ski is ideal for both handpack trail riding and loose powder riding. Its keel design is aggressive for sharp cornering and resists darting. Available in four colors to match your sled.

\$129.99 each \$199.99 CAN #2900256

b) SLP "STRAIGHT LINE TRACKER" SKI

Ideal for deep snow and aggressive trail riding. Makes a perfect track in almost all conditions. Improves flotation. Increases front-end lift. Powder Control Wings provide aggressive steering ability with minimum effort. Reduces darting on packed or groomed trails.

\$189.99 each \$299.99 CAN

Yellow (shown) #2873856, Black #2873853, Blue #2873854, Red #2873855

c) SADDLELESS

Trail-oriented performance. Colors to personalize sled.

\$129.99 each \$194.99 CAN #2874186

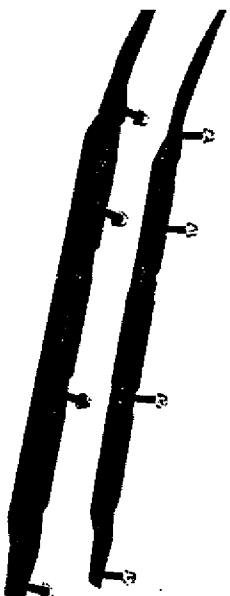

d) POLARIS SIDEHILLER II SKI

Precision built to exact Polaris machine specifications. Dual runners for easy steering with no darting (sold separately).

Right SKI \$169.99 \$269.99 CAN #2874336
Left SKI \$169.99 \$269.99 CAN #2874335

CONTROL IS TO TURNS WHAT POWER IS TO A STRAIGHT LINE.

The length of the carbide skag on the runner mounted to the bottom of the ski is always a major factor in control and performance. The longer and less worn the carbide is, the more turning control you'll have. But it's important to match your choice of carbide to the number of studs you install. A well-matched set of carbides and studs is the best way to get optimal traction, with complete control, on hard snow and ice surfaces. It's time to make the snow start answering to you.

POWER SHOULD NEVER BE WASTED.

How you harness your sled's power is just as important as how much power it has. This is where a set of high-quality studs comes into play. The number of studs you put on the track determines the straight-line traction you have available on hard snow surfaces. More studs equals more traction in a straight line. Match that straight-line power to the set of skis and carbides that are right for it, and not only will you get straight-line power, but you'll get the control you need to keep putting that power to the snow.

REVERSE SHOULDN'T IMPEDE YOUR FORWARD PROGRESS.

Progress is getting reverse without a weight penalty. Without the extra parts of a traditional reverse system, there are fewer things to go wrong and less added weight to slow you down.

a) ELECTRIC REVERSE KITS

An extremely popular upgrade. Perfectly matched to Polaris machine specs. A must for anyone who trails their sled. If you'd prefer a mechanical reverse, we have those too. See your Polaris dealer for correct application.

d) KEY-OPERATED ELECTRIC START KITS

Fast and dependable electric starts. Especially nice for extreme cold conditions. Perfectly matched to Polaris machine specs. Much more consistent and less effort than recoil rope pull starts. Available for most Polaris models. See your Polaris dealer for correct application.

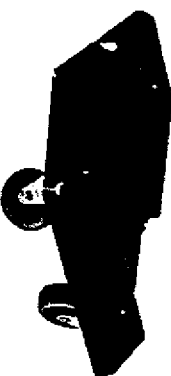

IT'S NOT TOO LATE TO TEACH YOUR SLED ELECTRIC START.

One leg on the seat, torso cocked, loaded and ready for another pull on the rope. It's not always how you want to start your sled. These kits were designed as an exact match to Polaris machine specs, for fast, easy starts every time. When it's way below zero, sometimes it's nice to start a ride with no strings attached.

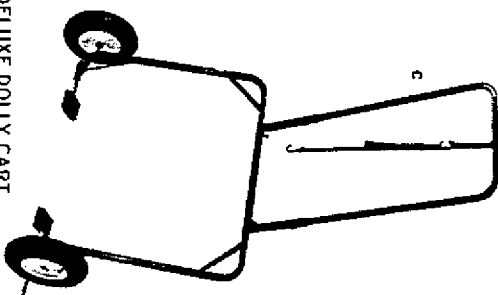

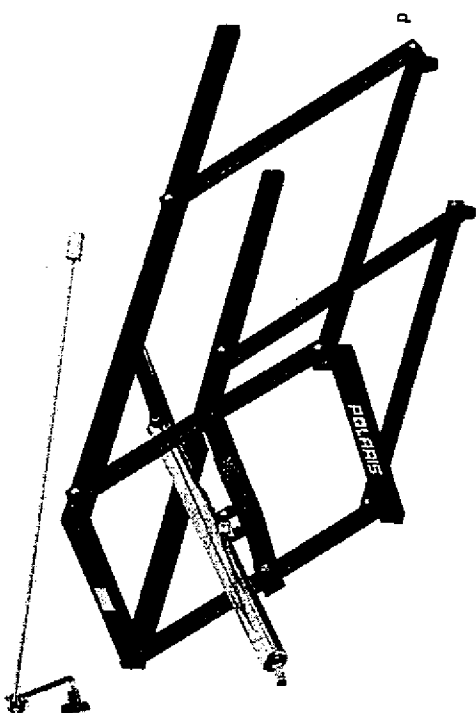

a| STATIONARY JACKSTAND
The rear bumper rests on supports to hold your sled track completely off the ground. Rugged steel construction stands 25" tall.
\$69.99 \$103.99 CAN #2874104

b| SNOWMOBILE WHEEL DOLLIES
Protect floors from carbides and studs. Includes three dollies (2 for skis and 1 for track) and safety straps and rubber-coated wheels.
\$59.99 \$89.99 CAN #2874156

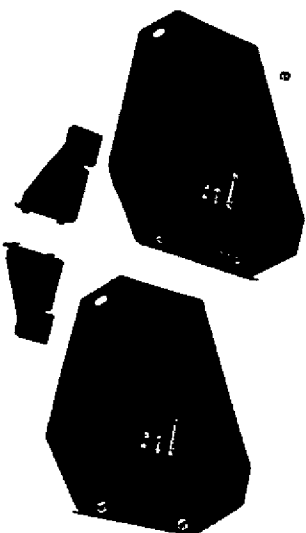

c| DELUXE DOLLY CART
Front lever arms anchor under chassis while rear strap raises track. Sturdy construction won't bend under weight of sled.
\$279.99 \$399.99 CAN #2874147

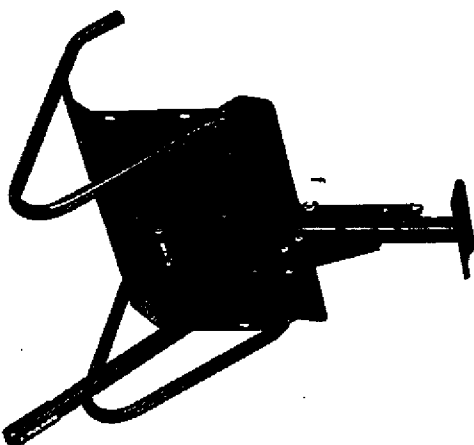

d| SNOWMOBILE LIFT
Big enough to handle all Polaris sleds. Gets the whole sled off the ground, making it ideal for maintenance and repairs of suspension and track. The extension handle makes it easy to raise and lower stand.
\$279.99 \$399.99 CAN #2872237

EVERY RIDE SHOULD LAST FOREVER.

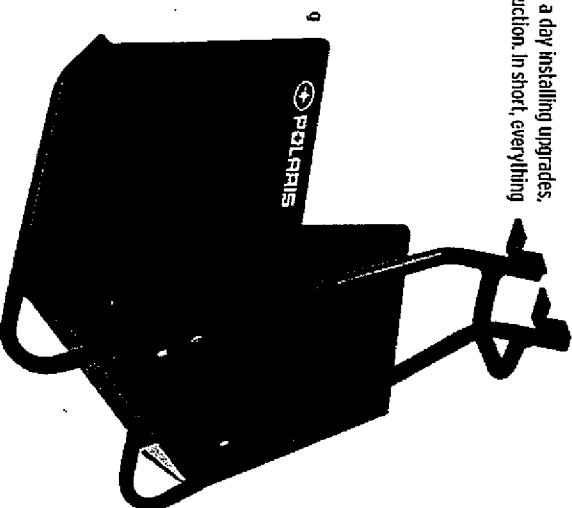

But much as we'd all like them to, they don't. At some point in time we all have to put the sled away. And whether that's for a day installing upgrades, a season in the garage, or just a quick check underneath, there's something here to meet your needs. Durable designs. Solid construction. In short, everything you need to make sure your sled is always right where it needs to be - ready for its next ride.

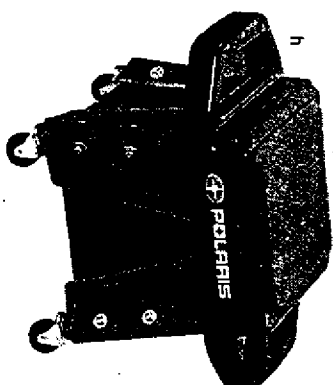

e| HANGERS AND SIDE PANELS
Steel hanger brackets and tough plastic side panels let you hook your universal lift stand right on your bumper. It's an easy way to get your stand to the staging or run-up area. No other stand on the market offers this unique carry feature for use with all Polaris machines.
\$39.99 \$62.99 CAN #2874079

f| LEVER LIFT JACKSTAND
This popular design allows you to lever-tilt your machine with ease. The durable steel construction provides secure lift for all Polaris machines.
\$129.99 \$199.99 CAN #2873833

g| ALUMINUM RACE JACKSTAND
Constructed of lightweight aluminum track, will protect your track when you're not using your sled or before the big race. These custom-fit stands work with all Polaris machines.
\$139.99 \$199.99 CAN #2873832

h| MECHANICAL ROLLING SEAT
This popular stand is height adjustable for your various maintenance uses. A huge, durable rubber top - and a large parts tray aid in any project. Withholds up to 600 lbs.
\$74.99 \$99.99 CAN #2855791

NO ONE KNOWS MORE ABOUT A POLARIS THAN POLARIS.

When the Pure Polaris line of oils and lubes was designed, they were created as the perfect match to the high-performance needs of Polaris sleds. To work flawlessly when the engines are screaming wide open in brutal cold, or just cruising through a scenic forest, when you're the person holding the throttle, you don't want to mess around with anything less.

BEFORE YOU RIDE

Keep your sled performing and looking like it's fresh off the showroom floor. Premium Grease to lube the suspension. Aerosol Cleaners to keep the engine clean on the outside and Carbon Clean Fuel Treatment to keep it clean on the inside. Touch up paint. Premium Chaincase Lubricant. Fuel Stabilizer and de-icer. All designed for one purpose: to make sure your sled looks as good after its hundredth ride as it did after its first.

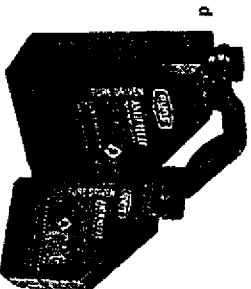

a) SNOWMOBILE PREPARATION KIT

b) AEROSOL CLEANERS

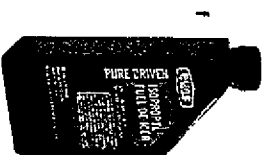

c) TOUCH-UP PAINT

d) PREMIUM ANTIFREEZE

e) PREMIUM FUEL STABILIZER

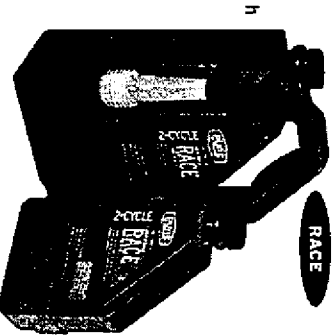

f) ISOPROPYL FUEL DE-ICER

WHILE YOU RIDE

Polaris offers oils for every application. YES II oil specifically designed for exhaust valve engines. Race oil for extreme conditions. Synthetic chaincase oil. Specifically formulated for your Polaris machine.

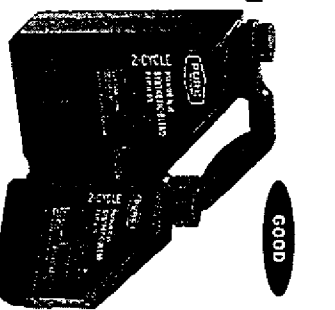

g) YES II SYNTHETIC 2-CYCLE OIL
New cleaner burning, low odor, smokeless oil formulation. Designed to improve exhaust valve performance.

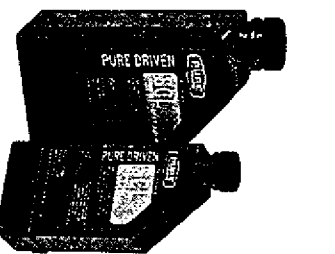

h) HIGH PERFORMANCE RACING OIL
The last engine and exhaust valve delerency available. Anti-wear additive extends ring, cylinder and bearing life.

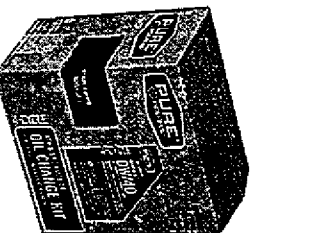

i) PREMIUM GOLD SYNTHETIC OIL
"Smokeless," clean-burning synthetic lubricant. High-ubricity formulation provides maximum engine protection.

j) SYNTHETIC BLEND
High-viscosity for peak performance at high engine temperatures. Most advanced synthetic blend 2-cycle lubricant on the market.

k) SYNTHETIC CHAINCASE LUBRICANT
Prevents rust, oxidation and corrosion of internal chaincase components. Provides maximum protection for extreme operating temperatures.

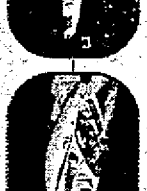

l) OIL CHANGE KIT-4-STROKE
Kit includes two 1-qt. bottles of premium synthetic engine oil and filter.

Fifty years ago, when Polaris was just a small company, it was known for its snowmobiles. But today, Polaris is a global leader in the recreational vehicle industry, with a wide range of products including ATVs, side-by-sides, and motorcycles.

At Polaris, we're committed to providing you with the best possible experience. Our dealers are trained to help you choose the right vehicle for your needs, and our customer service team is always ready to assist you. We also offer a wide range of financing options to make your purchase easier. So, whether you're looking for a new snowmobile, ATV, or motorcycle, Polaris has you covered. The Way Out, bearing our name with the perfect measure of style, design and well-earned fun.

Polaris Industries has grown to include extensive support. Our large dealer network provides everything from customer service to financial services, so any assistance you need is now at hand. At Polaris, we know our hard work pays off. We hope our machines remind you that you do, too. Polaris. The Way Out.
